## Conventions

The following conventions are used in this manual:

|                        |  |
|------------------------|--|
| <b>SCREEN MESSAGES</b> | Denotes actual messages that appear on screen.                                       |
| <b>NOTE</b>            | Gives bits and pieces of additional information related to the current topic.        |
| <b>WARNING</b>         | Alerts you to any damage that might result from doing or not doing specific actions. |
| <b>CAUTION</b>         | Gives precautionary measures to avoid possible hardware or software problems.        |
| <b>IMPORTANT</b>       | Reminds you to do specific actions relevant to the accomplishment of procedures.     |

---

## Preface

Before using this information and the product it supports, please read the following general information.

1. This Service Guide provides you with all technical information relating to the BASIC CONFIGURATION decided for Acer's "global" product offering. To better fit local market requirements and enhance product competitiveness, your regional office MAY have decided to extend the functionality of a machine (e.g. add-on card, modem, or extra memory capability). These LOCALIZED FEATURES will NOT be covered in this generic service guide. In such cases, please contact your regional offices or the responsible personnel/channel to provide you with further technical details.
2. Please note WHEN ORDERING FRU PARTS, that you should check the most up-to-date information available on your regional web or channel. If, for whatever reason, a part number change is made, it will not be noted in the printed Service Guide. For ACER-AUTHORIZED SERVICE PROVIDERS, your Acer office may have a DIFFERENT part number code to those given in the FRU list of this printed Service Guide. You MUST use the list provided by your regional Acer office to order FRU parts for repair and service of customer machines.

# System Specifications

---

## Features

Below is a brief summary of the computer's many feature:

### Platform and memory

- Intel® Centrino® Duo mobile technology, featuring
  - ↳ Intel® Core 2 Duo processor T5500/T5600 (2MB L2 cache, 1.66/1.83 GHz, 667 MHz FSB) and T7200/T7400/T7600 (4 MB L2 cache, 2.2/2.16/2.33 GHz, 667 MHz FSB) (**for Aspire 5580**)
  - ↳ Intel® Core Duo processor T2300/T2400/T2500/T2600 (2MB L2 cache, 1.66/1.83/2.2/2.16 GHz, 667 MHz FSB) (**for Aspire 5570**)
  - ↳ Mobile Intel® 945GM (for Aspire 5570)/945PM (for Aspire 5580) +ICH7M
  - ↳ INtel PRO/Wireless 3945ABG network connection (dual-band tri-mode 802.11a/b/g) or Intel PRO/Wireless 3945BG network connection (dual-mode 802.11b/g)
- Intel Celeron M processor 410/420/430 (1 MB L2 cache, 1.46/1.60/1.73 GHz, 533 MHz FSB) or higher (**for Aspire 3680**)
- Mobile Intel 940GML+ICH7M (**for Aspire 3680**)
- Up to 2 GB of DDR2 533/677 MHz system memory, upgradeable to 4 GB using two soDIMM modules (dual-channel support)
- 256/512 MB of DDR2 533 MHz memory, upgradeable to 2 GB using two soDIMM modules (dual-channel support) (**for Aspire 3680**)

### Display and graphics

- 14.1" WXGA Acer CrystalBrite™ TFT LCD, 1280 x 800 pixel resolution, supporting simultaneous multi-window viewing on dual displays via Acer GridVista™ (for selected models)
- NVIDIA® GeForce Go 7300 up to 256 MB TurboCache (128 MB of dedicated GDDR2 VRAM, up to 128 MB of shared system memory), supporting Microsoft® DirectX 9.0, Shader Model 3.0, OpenEXR High Dynamic Range (HDR) technology, NVIDIA® PowerMizer™ 6.0 PCI Express® (for selected models)
- Mobile Intel® 940GML Express chipset with integrated 3D graphics, featuring Intel® Graphics Media Accelerator (GMA) 950, up to 224 MB of shared system memory, supporting Microsoft® DirectX® 9.0 dual independent display (**for Aspire 3680**)
- 16.7 million colors
- Simultaneous LCD and CRT display, with LCD panel refresh rate at 70Hz
- Up to 2048 x 1536 resolution via non-interlaced CRT display
- MPEG-2/DVD hardware-assisted capability
- Acer CinemaVision™ video technology (Acer Arcade)
- Acer ClearVision™ video optimizatin (Acer Arcade)

### Storage subsystem

- 40/60/80/100/120/160 GB hard disk drive
- Optical drive options:
  - ↳ 8X DVD-Super Multi double-layer
  - ↳ DVD/CD-RW combo (for selected models)
- 5-in 1 card reader, supporting Memory Stick®(MS), Memory Stick PRO™ (MS PRO),

---

MultiMediaCard (MMC), Secure Digital (SD), and xD-Picture Card<sup>TM</sup> (xD)

## Input devices

- 88/89-key keyboard
- Touchpad with 4-way scroll button
- Four easy-launch buttons
- Six media keys: volume up/down, play/pause, stop, next, previous (for selected models)
- Two front-access LED-switches: WLAN, Bluetooth®

## Audio

- Audio system with two built-in 1.5W speakers
- Intel® High-Definition audio support
- Sound Blaster Pro<sup>TM</sup> and MS Sound compatible
- S/PDIF (Sony/Philips Digital Interface) support for digital speakers
- Built-in microphone

## Communication

- Acer Video Conference featuring Voice and Video over Internet Protocol (VVoIP) support via Acer OrbiCam<sup>TM</sup> and optional Acer Bluetooth VoIP phone
- Acer OrbiCam<sup>TM</sup> 1.3 megapixel/310,000 pixel CMOS camera (LCD panel-mounted), featuring:
  - ↳ 225 degree ergonomic rotation
  - ↳ Acer PrimaLite<sup>TM</sup> technology
- WLAN:
  - ↳ Intel® PRO Wireless 3945AGB network connection (dual-band tri-mode 802.11a/b/g) or Intel® PRO/Wireless 3945BG network connection (dual-mode 802.11b/g) Wi-Fi CERTIFIED solution, supporting Acer SignalUp wireless technology
  - ↳ Acer InviLink<sup>TM</sup> 802.11b/g Wi-Fi CERTIFIED<sup>TM</sup> solution, supporting Acer SignalUp<sup>TM</sup> wireless technology **(for Aspire 3680)**
- WPAN: Bluetooth® 2.0+EDR (Enhanced Data Rate)
- LAN: Fast Ethernet; Wake-on-LAN ready
  - ↳ Gigabit Ethernet; Wake-in-LAN ready (for Aspire 3680)
  - ↳ Fast Ethernet; Wake-on-LAN ready (for Aspire 5570/5580)
- Modem: 56K ITU V.92 modem with PTT approval; Wake-on ring ready

## I/O Ports

- PC Card slot (one Type II)
- 5-in-1 card reader (MS/MS PRO/MMC/SD/xD)
- Three USB 2.0 ports
- IEEE 1394 port (4-pin) (for selected models, yet for Aspire 3680/5570/5580, there is no IEEE 1394 port)
- Infrared port (for selected models, yet for Aspire 3680/5570/5580, there is no Infrared port)
- External display (VGA) port
- S-Video/TV-out (NTSC/PAL) port
- Headphones/speaker/line-out jack with S/PDIF support
- Microphone-in jack
- Line-in jack
- Ethernet (RJ-45) port

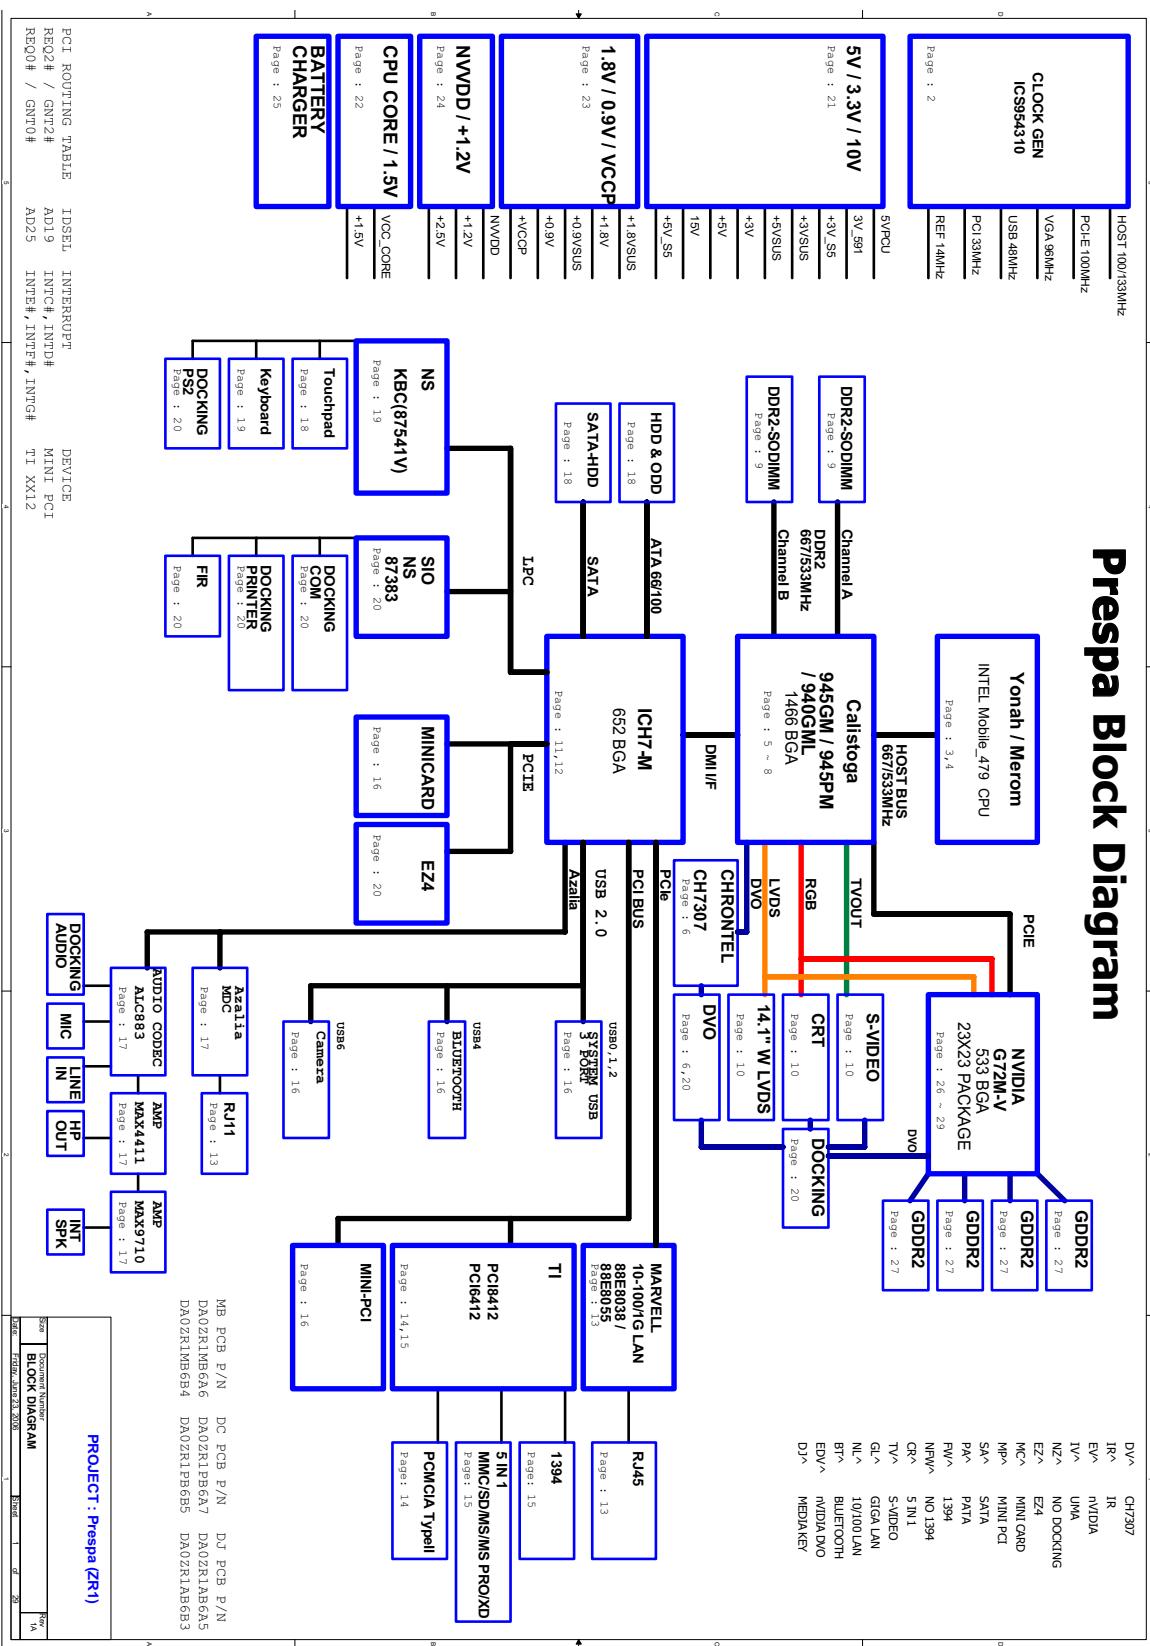

---

- Modem (RJ-11) port
- DC-in jack for AC adapter

## Environment

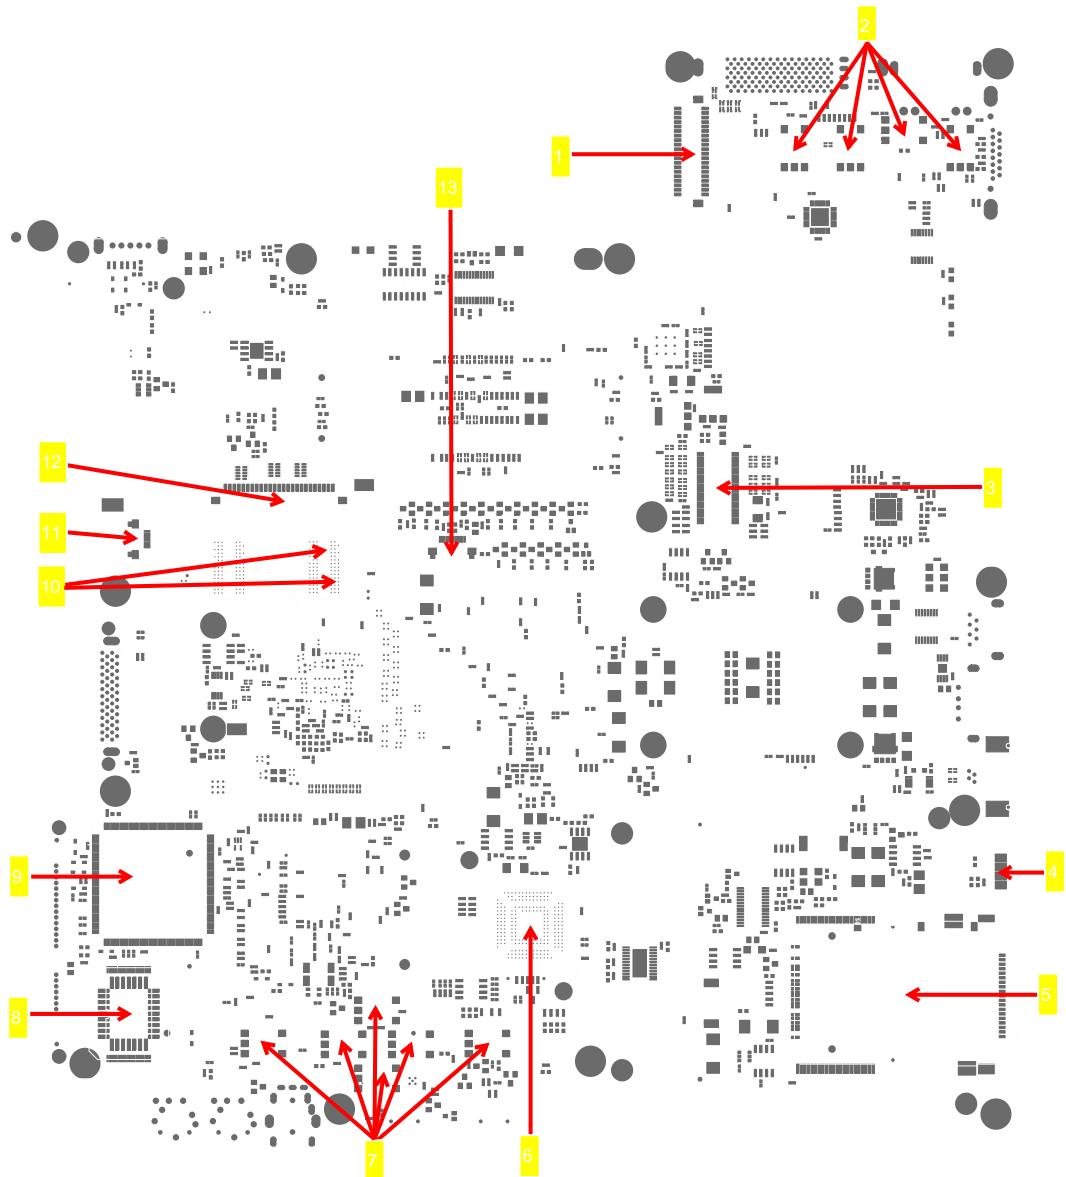

- Temperature:
  - operating: 5° C to 35° C
  - Non-operating: -20° C to 65° C
- Humidity (non-condensing):
  - operating: 20%~80%
  - Non-operating: 20%~80%

---

## Jumper Settings/Clear BIOS Password Procedures

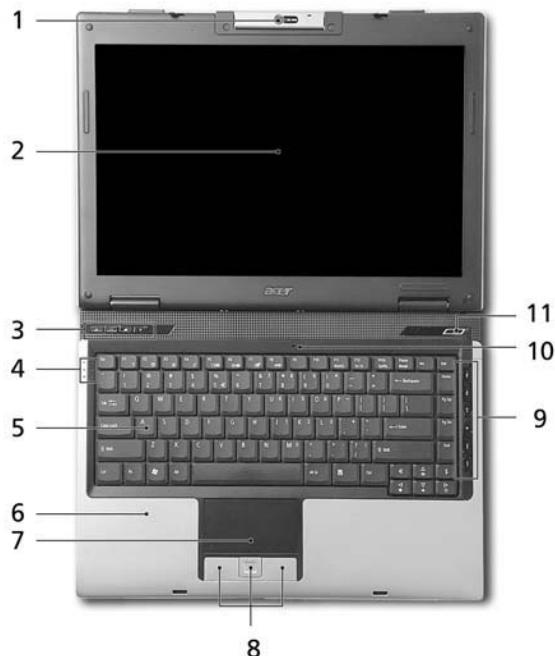

1. Please see the bottom side of the main board.
2. Find G1 jumper and short the jumper to clear BIOS password.

# Your Acer Notebook tour

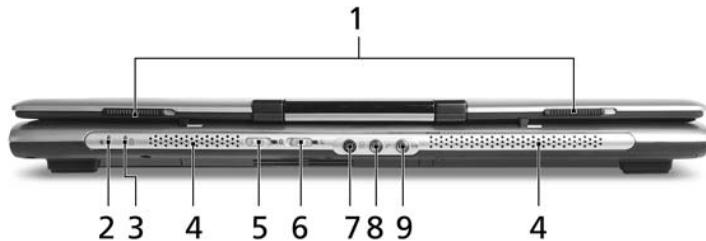

After knowing your computer features, let us show you around your new TravelMate computer.

## Front View

| #  | Icon | Item                                   | Description  |
|----|------|--|--|
| 1  |      | Built-in camera                        | 1.3 megapixel/310,000 pixel web camera for video communication. (for selected models)  |
| 2  |      | Display screen                         | Also called Liquid-Crystal Display (LCD), displays computer output.  |
| 3  |      | Easy-launch buttons                    | Buttons for launching frequently used program.   |
| 4  |      | Status indicators                      | Light-Emitting Diodes (LEDs) that light up to show the status of the computer's functions and components.  |
| 5  |      | Keyboard                               | For entering data into your computer.  |
| 6  |      | Palmrest                               | Comfortable support area for your hands when you use the computer.   |
| 7  |      | Touchpad                               | Touch-sensitive pointing device which functions like a computer mouse.   |
| 8  |      | Click buttons (left, center and right) | The left and right buttons function like the left and right mouse buttons; the center button serves as a 4-way scroll button.                      |
| 9  |      | Arcade/media/volume buttons            | For use with Acer Arcade and other media playing programs (for selected models, yet Aspire 3680/557/5580 do not have Arcade/media/volume buttons). |
| 10 |      | Microphone                             | Internal microphone for sound recording.   |
| 11 |      | Power button                           | Turns the computer on and off.   |

## Closed Front View

| # | Icon | Item  | Description   |
|---|------|---|---|
| 1 |      | Latch   | Locks and release the lid   |
| 2 |      | Power indicator                                       | Indicates the computer's power status.  |
| 3 |      | Battery indicator                                     | Indicates the computer's battery status.  |
| 4 |      | Speakers  | Left and right speakers deliver stereo audio output.  |
| 5 |      | Bluetooth® communication switch/indicator             | Press to enable/disable Bluetooth function. Lights to indicate the status of Bluetooth-communications (optional).   |
| 6 |      | Wireless communication button/indicator               | Press to enable/disable Wireless function. Lights to indicate the status of wireless LAN communications (optional). |
| 7 |      | Headphones/speakers/line-out jack with S/PDIF support | Connects to audio line-out devices (e.g., speakers, headphones).  |
| 8 |      | Microphone-in jack                                    | Accepts input from external microphones.  |
| 9 |      | Line-in jack  | Accepts audio line-in devices (e.g., audio CD player, stereo walkman).  |

## Left View

| # | Icon | Item                           | Description   |
|---|------|--------------------------------|---|
| 1 |      | External display (VGA) port    | Connects to a display device (e.g., external monitor, LCD projector).   |
| 2 |      | Ventilation slots              | Enable the computer to stay cool, even after prolonged use.   |
| 3 |      | S-Video/TV-out (NTSC/PAL) port | Connects to a television or display device with S-video input.  |
| 4 |      | USB 2.0 port                   | Connects to USB 2.0 devices (e.g. USB mouse, USB camera).   |
| 5 |      | 4-pin IEEE 1394 port           | Connects to IEEE 1394 devices ( <b>for selected models, yet Aspire 3680/5570/5580 do not have IEEE 1394 port</b> )  |
| 6 |      | Infrared port                  | Interfaces with infrared devices (e.g., infrared printer and IR-aware computer). ( <b>for selected models, yet Aspire 3680/5570/5580 do not have infrared port</b> )            |
| 7 |      | 5-in-1 card reader             | Accepts Memory Stick (MS), Memory Stick PRO (MS PRO), MultiMediaCard (MMC), Secure Digital (SD) and xD-Picture Card (xD).<br>Note: Only one card can operate at any given time. |
| 8 |      | PC Card slot                   | Accepts one Type II PC Card.  |
| 9 |      | PC Card slot eject button      | Ejects the PC Card from the slot.   |

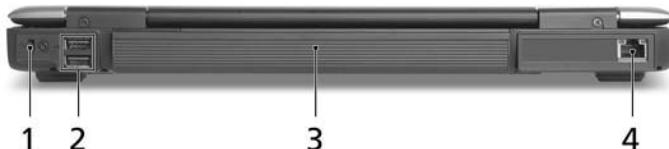

---

## Right View

| # | Icon | Item                          | Description  |
|---|------|-------------------------------|--|
| 1 |      | Optical drive                 | Internal optical drive; accepts CDs or DVDs (slot-load or tray-load depending on model).   |
| 2 |      | Optical disk access indicator | Lights up when the optical drive is active (location depends on model).                    |
| 3 |      | Optical drive eject button    | Ejects the optical disk from the drive (location depends on model).                        |
| 4 |      | Emergency eject hole          | Ejects the optical drive tray when the computer is turned off (location depends on model). |
| 5 |      | Modem (RJ-11) port            | Connects to a phone line.  |
| 6 |      | DC-in jack                    | Connects to an AC adapter.   |

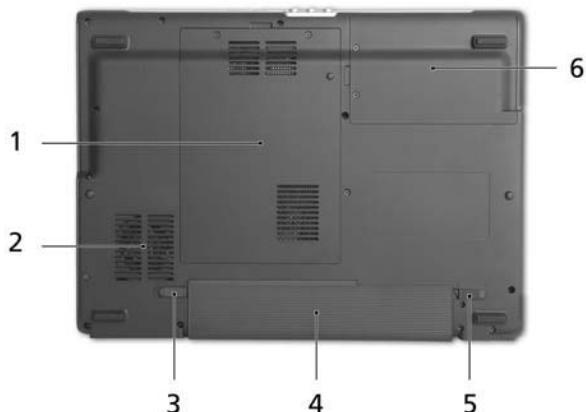

## Rear Panel

| # | Icon | Item                 | Description   |
|---|------|----------------------|---|
| 1 |      | Kensington lock slot | Connects to a Kensington-compatible computer security lock. |
| 2 |      | USB 2.0 ports        | Connect to USB 2.0 devices (e.g., USB mouse, USB camera).   |
| 3 |      | Battery              | Powers the computer   |

| # | Icon  | Item                  | Description                                   |
|---|---|-----------------------|---|
| 4 |  | Ethernet (RJ-45) port | Connects to an Ethernet 10/100-based network. |

## Bottom Panel

| # | Item                  | Description   |
|---|-----------------------|---|
| 1 | Memory compartment    | Houses the computer's main memory.  |
| 2 | Cooling fan           | Helps keep the computer cool.<br>Note: Do not cover or obstruct the opening of the fan. |
| 3 | Battery release latch | Release the battery for removal.  |
| 4 | Battery bay           | Houses the computer's battery pack.   |
| 5 | Battery lock          | Locks the battery in position.  |
| 6 | Hard disk bay         | Houses the computer's hard disk (secured with screws)                                   |

## Indicators

The computer has four easy-to-read status indicators:

The front panel indicators are visible even when the computer cover is closed up.

| Icon | Function     | Description  |
|------|--------------|--|
|      | Cap lock     | Lights when Cap Lock is activated                        |
|      | Num lock     | Lights when Num Lock is activated.                       |
|      | HDD          | Indicates when the hard disc or optical drive is active. |
|      | Bluetooth    | Indicates the status of Bluetooth communication.         |
|      | Wireless LAN | Indicates the status of wireless LAN communication.      |
|      | Power        | Lights up when the computer is on.                       |
|      | Battery      | Lights up when the battery is being charged.             |

**NOTE:** 1. **Charging:** The light shows amber when the battery is charging. 2. **Fully charged:** The light shows green when in AC mode.

## Easy-Launch Buttons

Located above the keyboard are four buttons. These buttons are called easy-launch buttons. They are: mail Web browser, Empowering Key “*e*” and one user-programmable button.

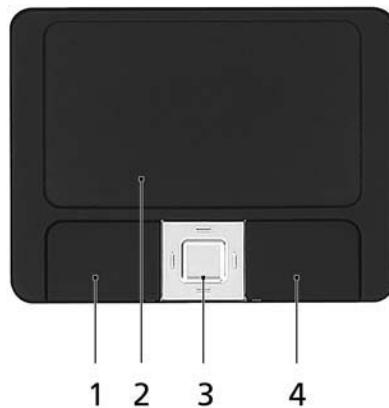

Press “*e*” to run the Acer Empowering Technology. The mail and Web browser buttons are pre-set to email and Internet programs, but can be reset by users. To set the Web browser, mail and programmable buttons, run the Acer Launch Manager.

| Launch key | Default application                            |
|------------|--|
| <i>e</i>   | Acer Empowering Technology (user-programmable) |
| ✉          | Email application (user-programmable)          |
| 🌐          | Internet browser (user-programmable)           |
| P          | User-programmable                              |

## Touchpad Basics

The following teaches you how to use the touchpad:

- Move your finger across the touchpad (2) to move the cursor.
- Press the left (1) and right (4) buttons located beneath the touchpad to perform selection and execution functions. These two buttons are similar to the left and right buttons on a mouse. Tapping on the touchpad is the same as clicking the left button.
- Use the 4-way scroll (3) button to scroll up or down and move left or right a page. This button mimics your cursor pressing on the right scroll bar of Windows applications.

| Function            | Left Button (1)  | Right Button (4) | Main touchpad (2)  | Center button (3)                          |
|---------------------|--|------------------|--|--|
| Execute             | Click twice quickly  |                  | Tap twice (at the same speed as double-clicking the mouse button)  |  |
| Select              | Click once   |                  | Tap once   |  |
| Drag                | Click and hold, then use finger to drag the cursor on the touchpad |                  | Tap twice (at the same speed as double-clicking a mouse button) then hold finger to the touchpad on the second tap to drag the cursor. |  |
| Access context menu |  | Click once       |  |  |
| Scroll              |  |                  |  | Click and hold to move up/down/left/right. |

**NOTE:** When using the touchpad, keep it - and your fingers - dry and clean. The touchpad is sensitive to finger movement; hence, the lighter the touch, the better the response. Tapping too hard will not increase the touchpad's responsiveness.

**NOTE:** By default, vertical and horizontal scrolling is enabled on your touchpad. It can be disabled under Mouse settings in Windows Control Panel.

# Using the Keyboard

The keyboard has full-sized keys and an embedded keypad, separate cursor keys, two Windows keys and twelve function keys.

## Lock Keys and embedded numeric keypad

The keyboard has three lock keys which you can toggle on and off.

| Lock Key                  | Description  |
|---------------------------|--|
| Caps Lock                 | When Caps Lock is on, all alphabetic characters typed are in uppercase.  |
| Num lock<br><Fn>+<F11>    | When Num Lock is on, the embedded keypad is in numeric mode. The keys function as a calculator (complete with the arithmetic operators +, -, *, and /). Use this mode when you need to do a lot of numeric data entry. A better solution would be to connect an external keypad. |
| Scroll lock<br><Fn>+<F12> | When Scroll Lock is on, the screen moves one line up or down when you press the up or down arrow keys respectively. Scroll Lock does not work with some applications.  |

The embedded numeric keypad functions like a desktop numeric keypad. It is indicated by small characters located on the upper right corner of the keycaps. To simplify the keyboard legend, cursor-control key symbols are not printed on the keys.

| Desired Access                         | Num Lock On  | Num Lock Off                               |
|--|--|--|
| Number keys on embedded keypad         | Type numbers in a normal manner.                   |  |
| Cursor-control keys on embedded keypad | Hold <Shift> while using cursor-control keys.      | Hold <Fn> while using cursor-control keys. |
| Main keyboard keys                     | Hold <Fn> while typing letters on embedded keypad. | Type the letters in a normal manner.       |

## Windows Keys

The keyboard has two keys that perform Windows-specific functions.

| Key   | Icon | Description  |
|---|------|--|
| Windows key<br>  |      | <p>Pressed alone, this key has the same effect as clicking on the Windows Start button; it launches the Start menu. It can also be used with other keys to provide a variety of function:</p> <ul style="list-style-type: none"> <li> + &lt;Tab&gt; Activates next taskbar button.</li> <li> + &lt;E&gt; Opens the My Computer window</li> <li> + &lt;F1&gt; Opens Help and Support.</li> <li> + &lt;F&gt; Opens the Find: All Files dialog box.</li> <li> + &lt;R&gt; Opens the Run dialog box.</li> <li> + M Minimizes all windows.</li> <li>&lt;Shift&gt;+  + &lt;M&gt; Undoes the minimize all windows action.</li> </ul> |
|  Application key |      | This key has the same effect as clicking the right mouse button; it opens the application's context menu.  |

## Hot Keys

The computer employs hotkeys or key combinations to access most of the computer's controls like screen brightness, volume output and the BIOS utility.

To activate hot keys, press and hold the **<Fn>** key before pressing the other key in the hotkey combination.

| Hot Key | Icon  | Function              | Description  |
|---------|---|-----------------------|--|
| Fn-F1   | ?   | Hot key help          | Displays help on hot keys.                           |
| Fn-F2   |  | Acer eSetting         | Launches the Acer eSettings in Acer eManager.        |
| Fn-F3   |  | Acer ePowerManagement | Launches the Acer ePowerManagement in Acer eManager. |

| Hot Key | Icon | Function        | Description   |
|---------|------|-----------------|---|
| Fn-F4   |      | Sleep           | Puts the computer in Sleep mode.  |
| Fn-F5   |      | Display toggle  | Switches display output between the display screen, external monitor (if connected) and both. |
| Fn-F6   |      | Screen blank    | Turns the display screen backlight off to save power. Press any key to return.                |
| Fn-F7   |      | Touchpad toggle | Turns the internal touchpad on and off.   |
| Fn-F8   |      | Speaker toggle  | Turns the speakers on and off.  |
| Fn-     |      | Volume up       | Increases the speaker volume.   |
| Fn-     |      | Volume down     | Decreases the speaker volume.   |
| Fn-     |      | Brightness up   | Increases the screen brightness.  |
| Fn-     |      | Brightness down | Decreases the screen brightness   |

## Special Key

You can locate the Euro symbol and US dollar sign at the upper-center and/or bottom-right of your keyboard.  
To type:

---

## The Euro symbol

1. Open a text editor or word processor.
2. Either directly press the <Euro> symbol at the bottom-right of the keyboard, or hold <Alt Gr> and then press the <5> symbol at the upper-center of the keyboard.

## The US dollar sign

1. Open a text editor or word processor.
2. Either directly press the <Dollar> key at the bottom-right of the keyboard, or hold <Shift> and then press the <4> key at the upper-center of the keyboard.

**NOTE:** This function varies by the operating system version.

**NOTE:** Some fonts and software do not support the Euro symbol. Please refer to [www.microsoft.com/typography/faq/faq12.htm](http://www.microsoft.com/typography/faq/faq12.htm) for more information.

## Acer Empowering Technology

Acer's innovative Empowering Technology makes it easy for you to access frequently used functions and manage your new Acer notebook. It features the following handy utilities:

- Acer eNet Management (for selected models)** hooks up to location-based networks intelligently.
- Acer ePower Management** extends battery power via versatile usage profiles.
- Acer ePresentation Management** connects to a projector and adjusts display settings conveniently.
- Acer eDataSecurity Management (for selected models)** protects data with passwords and advanced encryption algorithms.
- Acer eLock Management (for selected models)** limits access to external storage media.
- Acer eRecovery Management** backs up and recovers data flexibly, reliably and completely.
- Acer eSettings Management** accesses system information and adjusts settings easily.
- Acer ePerformance Management** improves system performance by optimizing disk space, memory and registry settings.

For more information, press the <**e**> key to launch the Empowering Technology menu, then click on the appropriate utility and select the Help or Tutorial function.

### Empowering Technology password

Before using Acer eLock Management and Acer eRecovery Management, you must initialize the Empowering Technology password. Right-click on the Empowering Technology toolbar and select "Password Setup" to do so. If you do not initialize the Empowering Technology password, you will be prompted to do so when running Acer eLock Management or Acer eRecovery Management for the first time.

### Acer eNet Management (for selected models)

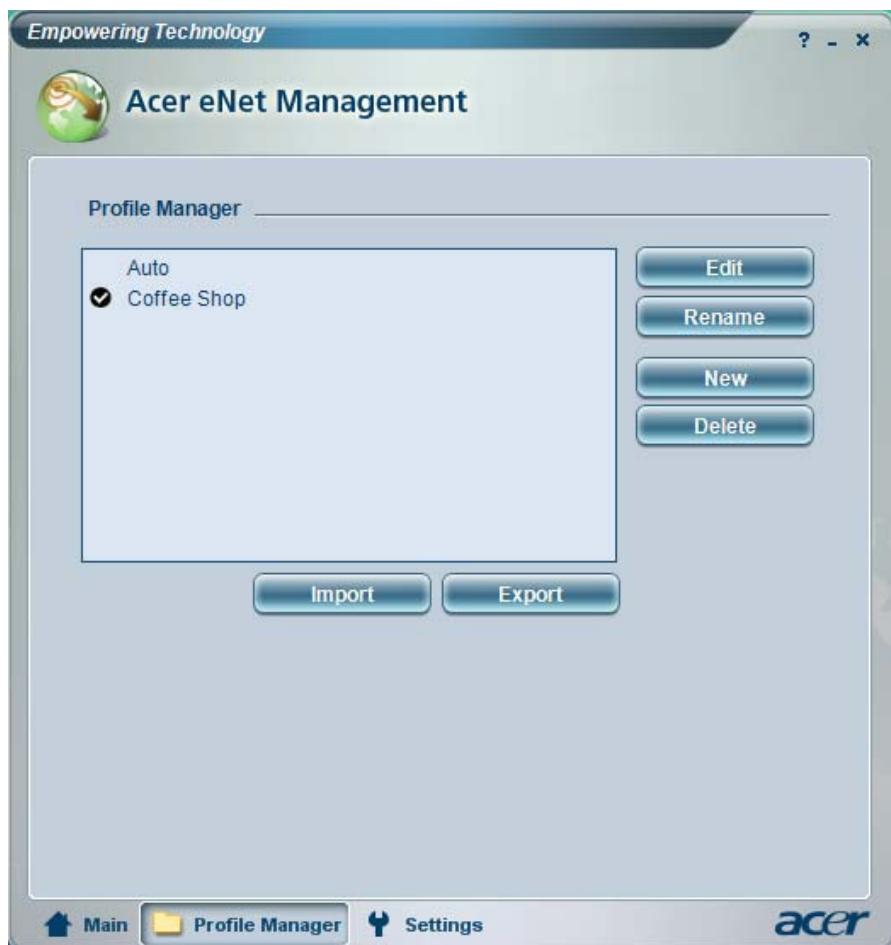

Acer eNet Management helps you to quickly and easily connect to both wired and wireless networks in a variety of locations. To access this utility, either click on the "**Acer eNet Management**" icon on your netbook, or start the program from the Start menu. You also have the option to set Acer eNet Management to start automatically when you boot up your PC.

Acer eNet Management automatically detects the best settings for a new location, while offering you the freedom to manually adjust the settings to match your needs.

Acer eNet Management can save network settings for a location to a profile, and automatically switch to the appropriate profile when you move from one location to another. Settings stored include network connection settings (IP and DNS settings, wireless AP details, etc.), as well as default printer settings.

Security and safety concerns mean that Acer eNet Management does not store username and password information.

## Acer ePower Management

Acer ePower Management features a straightforward user interface. To launch it, select Acer ePower Management from the Empowering Technology interface.

### AC Mode (Adapter mode)

The default setting is "Maximum Performance." You can adjust CPU speed, LCD brightness and other settings, or click on buttons to turn the following functions on/off: Wireless LAN, Bluetooth, CardBus, FireWire (1394), Wired LAN and Optical Device if supported.

### DC Mode (Battery mode)

There are four pre-defined profiles - Entertainment, Presentation, Word Processing, and Battery Life. You can also define up to three of your own.

#### To create new power profile

1. Change power settings as desired.
2. Click "Save as..." to save to a new power profile.
3. Name the newly created profile.
4. Select whether this profile is for Adapter or Battery mode, then click OK.
5. The new profile will appear in the profile list.

## Battery status

For real-time battery life estimates based on current usage, refer to the panel on the lower left-hand side of the window.

For additional options, click "**Settings**" to:

- Set alarms.
- Re-load factory defaults.
- Select what actions will be taken when the cover is closed or the power button is pressed.
- View information about Acer ePower Management.

## Acer ePresentation Management

Acer ePresentation Management lets you project your computer's display to an external device or project using the hot key: Fn + F5. If auto-detection hardware is implemented in the system, your system display will be automatically switched out when an external display is connected to the system.

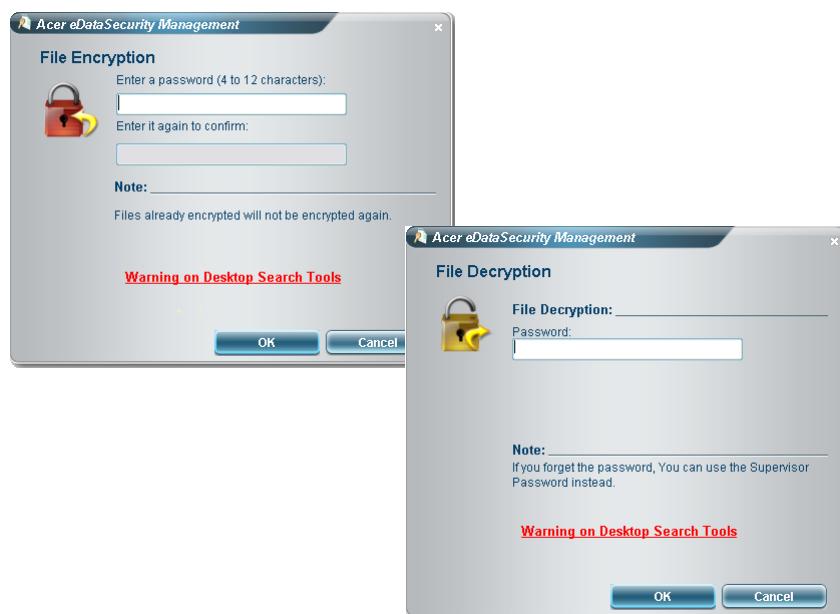

## Acer eDataSecurity Management (for selected models)

Acer eDataSecurity Management is handy file encryption utility that protects your files from being accessed by unauthorized persons. It is conveniently integrated with Windows explorer as a shell extension for quick and easy data encryption/decryption and also supports on-the-fly file encryption for MSN Messager and Microsoft Outlook.

The Acer eDataSecurity Management setup wizard will prompt you for a supervisor password and default encryption. This encryption will be used to encrypt files by default, or you can choose to enter your own file-specific password when encrypting a file.

**NOTE:** The password used to encrypt a file is the unique key that the system needs to decrypt it. If you lose the password, the supervisor password is the only other key capable of decrypting the file. If you lose both passwords, there will be no way to decrypt your encrypted file! **Be sure to safeguard all related passwords!**

## Acer eLock Management

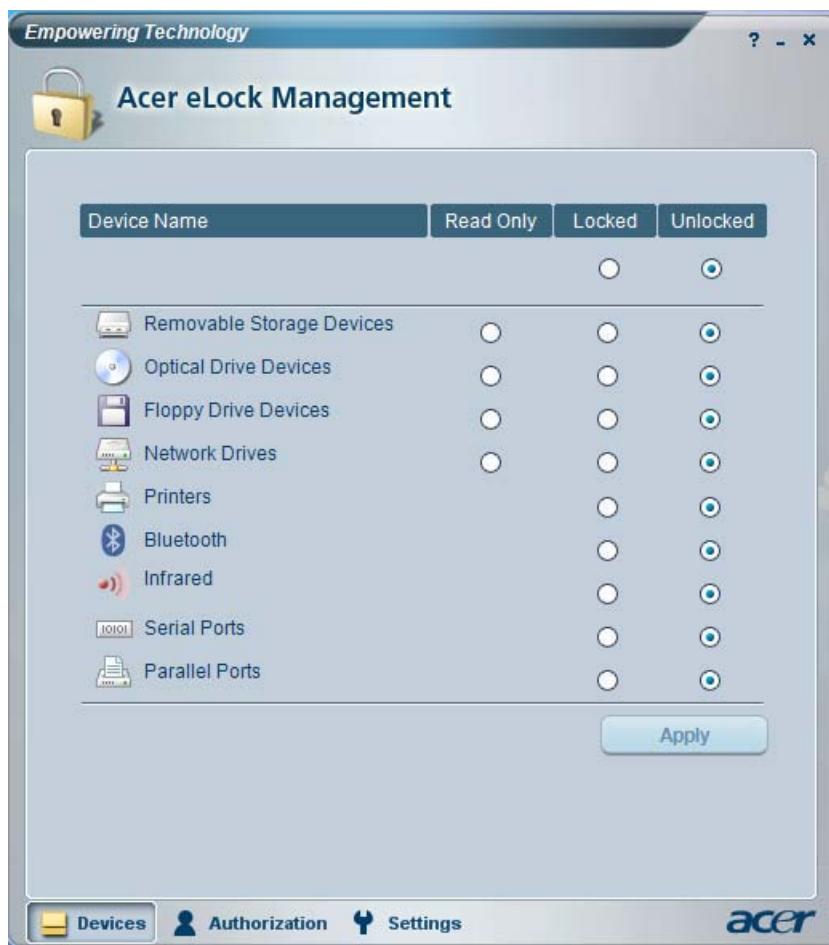

Acer eLock Management is a security utility that allows you to lock your removable data, optical and floppy drives to ensure that data can't be stolen while your notebook is unattended.

- Removable data devices - includes USB disk drives, USB pen drives, USB flash drives, USB MP3 drives, USB memory card readers, IEEE 1394 disk drives and any other removable disk drives that can be mounted as a file system when plugged into the system.
- Optical drive devices - includes any kind of CD-ROM or DVD-ROM drives.
- Floppy disk drives - 3.5-inch disks only.
- Interfaces - includes serial ports, parallel port, infrared (IR), and Bluetooth.

To activate Acer eLock Management, a password must be set first. Once set, you can apply locks to any of the devices. Lock(s) will immediately be set without any reboot necessary, and will remain locked after rebooting, until unlocked.

**NOTE:** If you lose your password, there is no method to reset it except by reformatting your notebook or taking your notebook to an Acer Customer Service Center. Be sure to remember or write down your password.

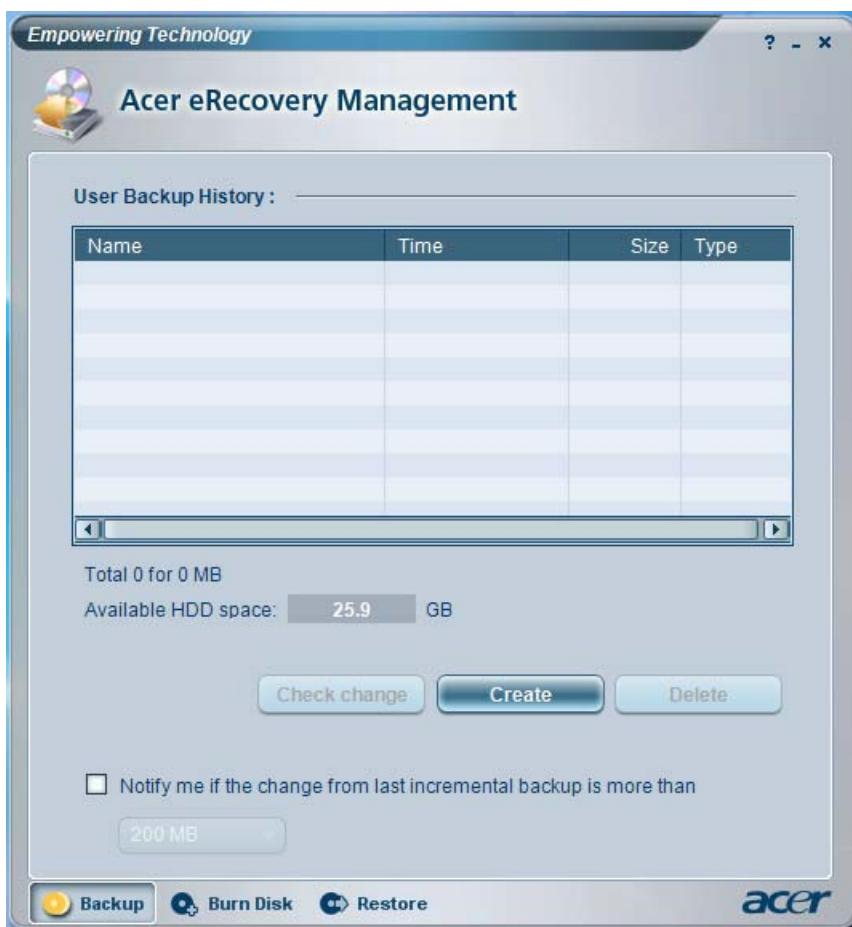

## Acer eRecovery Management

Acer eRecovery Management is a powerful utility that does away with the need for recovery disks provided by the manufacturer. The Acer eRecovery Management utility occupies space in a hidden partition on your system's HDD. User-created backups are stored on D:\ drive. Acer eRecovery Management provides you with:

- Password protection.
- Recovery of applications and drivers.
- Image/data backup:
  - Back up to HDD (set recovery point).
  - Back up to CD/DVD.
- Image/data recovery tools:
  - Recover from a hidden partition (factory defaults).
  - Recover from the HDD (most recent user-defined recovery point).
  - Recover from CD/DVD.

For more information, please refer to "Acer eRecovery Management"

**NOTE:** If your computer did not come with a Recovery CD or System CD, please use Acer eRecovery Management's "System backup to optical disk" feature to burn a backup image to CD or DVD. To ensure the best results when recovering your system using a CD or Acer eRecovery Management, detach all peripherals (except the external Acer ODD, if your computer has one), including your Acer ezDock.

## Acer eSettings Management

Acer eSettings Management allows you to inspect hardware specifications and to monitor the system health status. Furthermore, Acer eSettings Management enables you to optimize your Windows operating system, so your computer runs faster, smoother and better.

Acer eSettings Management also:

- Provides a simple graphical user interface for navigating.
- Displays general system status and advanced monitoring for power users.

The screenshot shows the Acer eSettings Management application window. At the top, there's a toolbar with icons for Help, Minimize, Maximize, and Close. Below the toolbar, the title bar reads "Empowering Technology" and "Acer eSettings Management". The main interface has tabs for "Summary", "Processor", "Memory", and "MB and BIOS", with "Summary" currently selected. A progress bar at the top right indicates "1 / 2". Below the tabs is a table displaying system hardware details. At the bottom of the table are "Asset tag:" and "Add Asset Tag" buttons. The footer contains links for "System Information", "Boot Options", and "BIOS Passwords", along with the Acer logo.

| Item              | Value                                 |
|-------------------|---------------------------------------|
| Manufacturer      | Acer, inc.                            |
| Product name      | TravelMate xxxx                       |
| Operating system  | Microsoft Windows XP Home Edition     |
| Processor         | Genuine Intel(R) CPU T2500 @...       |
| Chipset           | Intel 955XM/945GM/PM/GMS/940GML       |
| Wireless LAN card | Intel(R) PRO/Wireless 3945ABG Network |
| Ethernet card     | Broadcom NetXtreme Gigabit Ethernet - |
| System Memory     | 256 MB                                |
| Video memory      | 64 MB                                 |
| Hard drive 1      | WDC WD600UE-22HCT0,55.89 GB           |
| CD/DVD 1          | PHILIPS DVD+-RW SDVD8441              |
| Serial port       | Disabled                              |
| Infrared          | Enabled                               |
| Parallel port     | Disabled                              |
| Video             | Mobile Intel(R) 945GM Express Chipset |

## Acer ePerformance Management

Acer ePerformance Management is a system optimization tool that boosts the performance of your Acer notebook. It provides an express optimization method to release unused memory and disk space quickly. The user can also enable advanced options for full control over the following option:

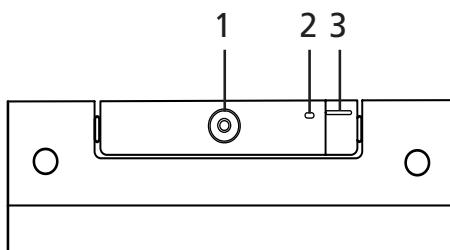

- Memory optimization - releases unused memory and check usage.
- Disk optimization - removes unneeded items and files.
- Speed optimization - improves the usability and performance of your Windows XP system.

## Acer OrbiCam

The Acer OrbiCam is a 1.3 megapixel CMOS camera appropriately mounted on the top of the LCD panel. The camera's 225-degree ergonomic rotation allows you to capture high-resolution photos or videos up front or at the back of the LCD panel. The Acer OrbiCam fully supports the Acer Video Conference technology so that you can transmit the best video quality over an instant Messenger service.

### Getting to know your Acer OrbiCam

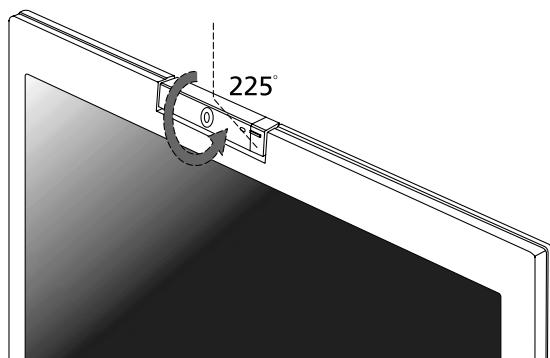

| No. | Item            |
|-----|-----------------|
| 1   | Lens            |
| 2   | Power indicator |

| No. | Item                               |
|-----|------------------------------------|
| 3   | Rubber grip (selected models only) |

### Rotating the Acer OrbiCam

The Acer OrbiCam rotates 225 degrees counterclockwise to achieve the desired angle. Refer to the illustrations below:

For your convenience, the camera snaps 45 degrees to match the position of your face in front or at the back of the LCD panel.

**NOTE:** Do not rotate the camera clockwise to prevent damage to the device.

### Launching the Acer OrbiCam

To launch the Acer OrbiCam, double click on the Acer OrbiCam icon on the screen.

OR

Click Start > All programs > Acer > Acer OrbiCam. The Acer OrbiCam capture windows window appears.

### Changing the Acer OrbiCam settings

#### Resolution

To change the capture resolution, click the displayed resolution at the bottom right corner of the capture window, then select the desired resolution.

#### Options

---

Click Options to display the Window, Preview, and Folder tabs. Use the options to change the capture window size, preview settings, and the folder for captured photos or videos.

### Camera Settings

- ❑ Basic settings: Click the Camera Settings icon on the bottom right corner of the capture display, then select Camera Settings from the pop-up menu. You can adjust the Video, Audio, and Zoom/Face tracking options from this window.

- ❑ Capture settings: From the Camera Settings window, click the Driver Settings button. The Properties window will appear.

---

- Device Settings allows you to change the camera brightness, contrast, hue, saturation, sharpness, etc.
- Advanced Settings allows you to achieve gain control, implement image mirror, select image enhancements and anti-flicker settings, and turn on/off the camera indicator.
- Zoom/Face Track Settings allows you to adjust the zoom level and turn the face tracking feature on or off.

### Capturing photos or videos

To capture a photo or a video clip, rotate the Acer OrbiCam to get the desired angle, then click the Take a Picture or Record a Video button. The Windows Picture and Fax Viewer or the Windows Media Player automatically launches to display or play a preview of the photo/video clip.

**NOTE:** By default, all photos and videos are saved in the My Pictures and My Videos folder.

### Using the Acer OrbiCam as webcam

The Acer OrbiCam is automatically selected as the capture device of any instant messenger (IM) application. To use the Acer OrbiCam as a webcam, open the IM service, then select the video/webcam feature. You can now broadcast from your location to an IM partner anywhere in the world.

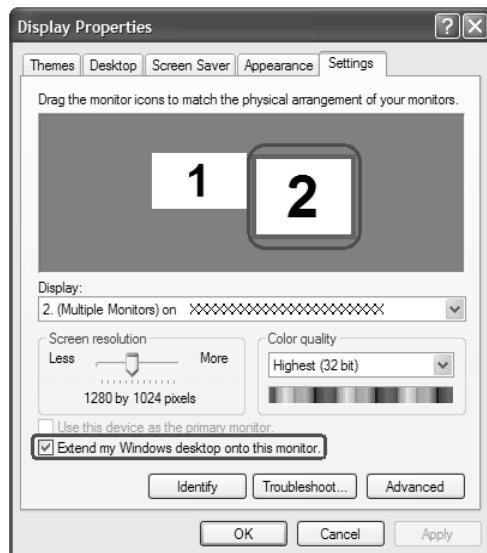

# Using the System Utilities

**NOTE:** The system utilities work under Microsoft Windows XP only.

## Acer GridVista (dual-display compatible)

**NOTE:** This feature is only available on certain models.

To enable the dual monitor feature of the notebook, first ensure that the second monitor is connected, then select **Start**, **Control Panel**, **Display** and click on **Settings**. Select the secondary monitor (**2**) icon in the display box and then click the check box **Extend my windows desktop onto this monitor**. Finally, click **Apply** to confirm the new settings and click **OK** to complete the process.

Acer GridVista is a handy utility that offers four pre-defined display settings so you can view multiple windows on the same screen. To access this function, please go to **Start>All Programs** and click on **Acer GridVista**. You may choose any one of the four display settings indicated below:

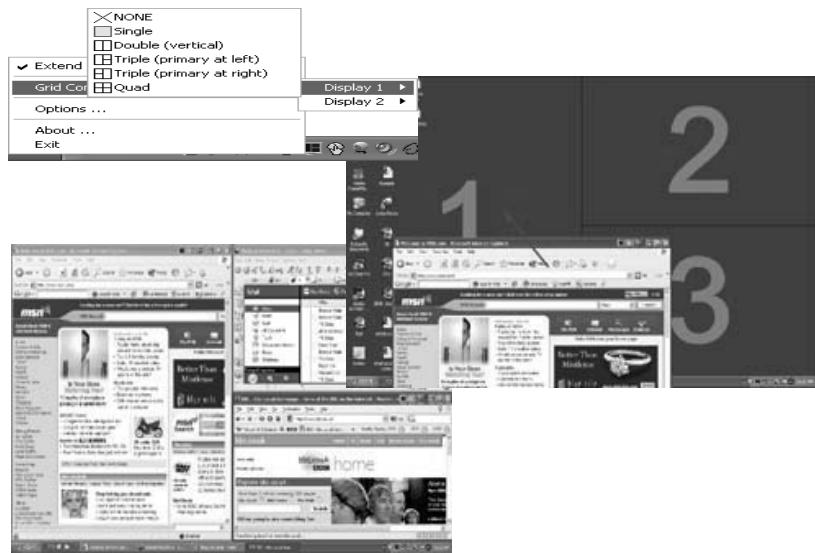

Double (vertical), Triple (primary at left), Triple (primary at right), or Quad Acer Gridvista is dual-display compatible, allowing two displays to be partitioned independently.

Acer Gridvista is dual-display compatible, allowing two displays to be partitioned independently.

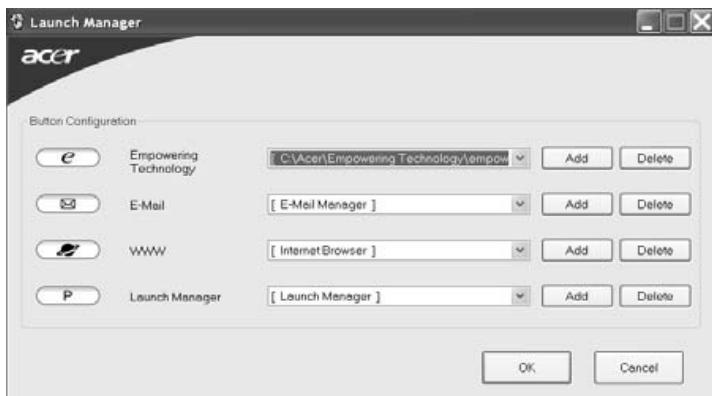

AcerGridVista is simple to set up:

1. Run Acer GridVista and select your preferred screen configuration for each display from the task bar.
2. Drag and drop each window into the appropriate grid.
3. Enjoy the convenience of a well-organized desktop.

**NOTE:** Please ensure that the resolution setting of the second monitor is set to the manufacturer's recommended value.

## Launch Manager

Launch Manager allows you to set the four easy-launch buttons located above the keyboard. You can access the Launch Manager by clicking on Start > All Programs > Launch Manager to start the application.

# Hardware Specifications and Configurations

## Processor

| Item             | Specification   |
|------------------|---|
| CPU type         | Intel® Core 2 Duo processor T5500/T5600 (2MB L2 cache, 1.66/1.83 GHz, 667 MHz FSB) and T7200/T7400/T7600 (4 MB L2 cache, 2/2.16/2.33 GHz, 667 MHz FSB) <b>(for Aspire 5580)</b><br>Intel® Core Duo processor T2300/T2400/T2500/T2600 (2MB L2 cache, 1.66/1.83/2/2.16 GHz, 667 MHz FSB) <b>(for Aspire 5570)</b><br>Intel® Celeron M processor 410/420/430 (1 MB L2 cache, 1.46/1.60/1.73 GHz, 533 MHz FSB) or higher <b>(for Aspire 3680)</b> |
| Core logic       | Intel® 945GM/945PM/940GML(Aspire 3680)+ICH7M  |
| CPU package      | Intel 478pin Micro-FCPGA  |
| CPU core voltage | VCC-CORE: 1.2875V (high frequency mode) to 0.8375V (Low frequency mode)<br>VCC-CORE: 0.75V (Deeper sleep mode)<br>VCC_CORE: voltage for the future processor will depend on VID0-6 for battery mode and setting via software for adapter mode for the future processor  |

## CPU Fan True Value Table

| DTS(degree C) | Fan Speed (rpm) | Acoustic Level (dBA) |
|---------------|-----------------|----------------------|
| 45            | 0               | 29                   |
| 50            | 2700+/-100      | 32                   |
| 70            | 3200+/-100      | 35                   |
| 78            | 3800+/-100      | 38                   |
| 90            | 4200+/-100      | 40                   |

## BIOS

| Item                  | Specification   |
|-----------------------|---|
| BIOS vendor           | Phneoix   |
| BIOS Version          | 1.00 (MP version)   |
| BIOS ROM type         | SST/AMD 1MB CMOS Boot Block Flash Memory  |
| BIOS ROM size         | 1M byte FLASH ROM SST   |
| BIOS package          | 32-pin PLCC   |
| Supported protocols   | ACPI 1.0b/2.0/3.0 compliance, PCI 2.2, System/HDD Password Security Control, INT 13H Extensions, PnP BIOS 1.0a SMBIOS 2.4, BIOS Boot Specification, Simple Boot Flag 1.0, Boot Block, PCI Bus Power Management Interface Specification, USB Specification 1.1/2.0, IEEE 1394 1.0, USB/1394 CD-ROM Boot Up support, PC Card Standard 1995 (PCMCIA 3.0 Compliant Device), IrDA 1.0, Intel AC97 CNR Specification, WfM 2.0, PXE 2.1, Boot Integrity Service Application Program Interface (BIS) 1.0, PC99a and Mobile PC2001 Compliant |
| BIOS password control | Set by setup manual   |

## Second Level Cache

| Item             | Specification |
|------------------|---------------|
| Cache controller | Built-in CPU  |

---

## **Second Level Cache**

| Item                    | Specification   |
|-------------------------|---|
| Cache size              | 4MB for Intel® Core 2 Duo processor T7200/T7400/T7600 (Aspire 5580)<br>2MB for Intel® Core 2 Duo processor T5500/T5600 and Intel® Core Duo processor T2300/T2400/T2500/T2600 (Aspire 5580/5570)<br>1MB for Intel® Celeron M processor 410/420/430 (Aspire 3680) |
| 1st level cache control | Always enabled  |
| 2st level cache control | Always enabled  |
| Cache scheme control    | Fixed in write-back   |

## **System Memory**

| Item                            | Specification  |
|---------------------------------|--|
| Memory controller               | Built-in Intel® 945GM/945PM/940GML   |
| Memory size                     | 0MB (no on-board memory)   |
| DIMM socket number              | 2 sockets  |
| Supports memory size per socket | 1024MB   |
| Supports maximum memory size    | Maximum memory up to 2GB for 32bit OS (with two 1GB SODIMM), 4G for 64bit OS (with two 2GB SODIMM) |
| Supports DIMM type              | DDR 2 Synchronous DRAM   |
| Supports DIMM Speed             | 533/677 MHz  |
| Supports DIMM voltage           | 1.8V and 0.9V  |
| Supports DIMM package           | 200-pin soDIMM   |
| Memory module combinations      | You can install memory modules in any combinations as long as they match the above specifications. |

## Memory Combinations

| Slot 1 | Slot 2 | Total Memory |
|--------|--------|--------------|
| 0MB    | 256MB  | 256MB        |
| 0MB    | 512MB  | 512MB        |
| 0MB    | 1024MB | 1024MB       |
| 0MB    | 2048MB | 2048MB       |
| 256MB  | 256MB  | 512MB        |
| 256MB  | 512MB  | 768MB        |
| 256MB  | 1024MB | 1280MB       |
| 256MB  | 2048MB | 2304MB       |
| 512MB  | 256MB  | 768MB        |
| 512MB  | 512MB  | 1024MB       |
| 512MB  | 1024MB | 1536MB       |
| 512MB  | 2048MB | 2560MB       |
| 1024MB | 0MB    | 1024MB       |
| 1024MB | 256MB  | 1280MB       |
| 1024MB | 512MB  | 1536MB       |
| 1024MB | 1024MB | 2048MB       |
| 1024MB | 2048MB | 3072MB       |
| 2048MB | 0MB    | 2048MB       |
| 2048MB | 256MB  | 2304MB       |
| 2048MB | 512MB  | 2560MB       |
| 2048MB | 1024MB | 3072MB       |
| 2048MB | 2048MB | 4096MB       |

**NOTE:** Above table lists some system memory configurations. You may combine DIMMs with various capacities to form other combinations. On above table, the configuration of slot 1 and slot 2 could be reversed.

## LAN Interface

| Item                   | Specification   |
|------------------------|---|
| Chipset                | Marvell 88E8030/88E8055 co-lay  |
| Supports LAN protocol  | 10/100Mbps (Giga LAN support for future selected models)  |
| LAN connector type     | RJ45  |
| LAN connector location | Rear side   |
| Features               | Integrated 10/100 BASE-T transceiver<br>Wake on LAN support compliant with ACPI 2.0<br>PCI v2.2 |

## Modem Interface

| Item                            | Specification  |
|---------------------------------|----------------|
| Data modem data baud rate (bps) | 56K            |
| Supports modem protocol         | V.90/V.92 WWDA |
| Modem connector type            | RJ11           |
| Modem connector location        | Right side     |

## Bluetooth Interface

| Item            | Specification  |
|-----------------|--|
| Chipset         | Built-in ICH7M   |
| Data throughput | 723 bps (full speed data rate)   |
| Protocol        | Bluetooth 1.1 (Upgradeable to Bluetooth 1.2 when SIG specification is ratified). |
| Interface       | USB 1.1  |
| Connector type  | Mini-USB   |

## Wireless Module 802.11a/b/g (optional device)

| Item            | Specification            |
|-----------------|--------------------------|
| Chipset         | Built-in ICH7M           |
| Data throughput | 11~54 Mbps               |
| Protocol        | 802.11a+b+g or 802.11b+g |
| Interface       | PCI bus                  |

## Hard Disk Drive Interface

| Item   |                                 |  |                                 |   |  |
|--|---------------------------------|--|---------------------------------|---|--|
| Vendor & Model Name                              | HGST HTS421240H9A               | WD WD600UE-22HCT0<br>HGST HTS541060G9A | SEAGATE ST98823A                | HGST MORAGA+ HTS541010G9A<br>Seagate ST9100824A | HGST HTS541612J9AT<br>WD1200UE-22KVT0 ML60 |

## Audio Interface

| Item                        | Specification  |
|-----------------------------|--|
| Audio Controller            | Realtek ALC883D Azalia and Amplifier Maxim MAX9710 & MAZ4411 |
| Audio onboard or optional   | Built-in   |
| Mono or Stereo              | Stereo   |
| Resolution                  | 18 bit stereo full duplex                                    |
| Compatibility               | HD audio Interface; S/PDIF output for PCM or AC-3 content    |
| Sampling rate               | 1Hz resolution VSR (Variable Sampling Rate)                  |
| Internal microphone         | Yes  |
| Internal speaker / Quantity | Yes/2 (1.5W speakers)  |

## Video Interface

| Item    | Specification  |
|---------|--|
| Chipset | Intel <sup>®</sup> 945GM (for Aspire 5570/5580 UMA models) and Intel <sup>®</sup> 940GML (Aspire 3680)<br>Nvidia G7300 (G72M-V) (for Aspire 5570/5580 discrete models) |

## Video Interface

| Item                            | Specification   |
|---------------------------------|---|
| Package                         | FCBGA 1466-pin for Intel® 945GM and Intel® 940GML<br>BGA 533 pin for Nvidia G7300 |
| Interface                       | internal PCIE   |
| Supports ZV (Zoomed Video) port | Yes   |

## Video Memory

| Item        | Specification  |
|-------------|--|
| Chipset     | Intel® 945GM (for Aspire 5570/5580 UMA models) and Intel® 940GML (Aspire 3680)<br>Nvidia G7300 (G72M-V) (for Aspire 5570/5580 discrete models) |
| Memory size | up to 128MB  |
| Interface   | DDR2   |

## USB Port

| Item                         | Specification                             |
|------------------------------|---|
| Chipset                      | Built-in ICH7M                            |
| USB Compliancy Level         | 2.0                                       |
| OHCI                         | USB 1.1 and USB 2.0 Host controller       |
| Number of USB port           | 3   |
| Location                     | One on the left side/two on the rear side |
| Serial port function control | Enable/Disable by BIOS Setup              |

## PCMCIA Port

| Item                            | Specification      |
|---------------------------------|--------------------|
| PCMCIA controller               | TI PCI8412/PCI6412 |
| Supports card type              | Type-II            |
| Number of slots                 | One type-II        |
| Access location                 | Left panel         |
| Supports ZV (Zoomed Video) port | No ZV support      |
| Supports 32 bit CardBus         | Yes                |

## System Board Major Chips

| Item                 | Controller   |
|----------------------|--|
| Core logic           | Intel® 945GM/945PM/940GML+ICH7M  |
| VGA                  | Intel® 945GM (for Aspire 5570/5580 UMA models) and Intel® 940GML (Aspire 3680)<br>Nvidia G7300 (G72M-V) (for Aspire 5570/5580 discrete models) |

### AC Adaptor

| Item                     | Specification                    |
|--------------------------|----------------------------------|
| Input rating             | 90V AC to 264V AC, 47Hz to 63Hz  |
| Maximum input AC current | 1.7A                             |
| Inrush current           | 220A@115VAC<br>220A@230VAC       |
| Efficiency               | 82% min. @115VAC input full load |

### System Power Management

| ACPI mode        | Power Management   |
|------------------|--|
| Mech. Off (G3)   | All devices in the system are turned off completely.                                 |
| Soft Off (G2/S5) | OS initiated shutdown. All devices in the system are turned off completely.          |
| Working (G0/S0)  | Individual devices such as the CPU and hard disc may be power managed in this state. |

---

## System Power Management

| ACPI mode           | Power Management   |
|---------------------|--|
| Suspend to RAM (S3) | CPU set power down<br>VGA Suspend<br>PCMCIA Suspend<br>Audio Power Down<br>Hard Disk Power Down<br>CD-ROM Power Down<br>Super I/O Low Power mode |
| Save to Disk (S4)   | Also called Hibernation Mode. System saves all system states and data onto the disc prior to power off the whole system.                         |

# System Utilities

## BIOS Setup Utility

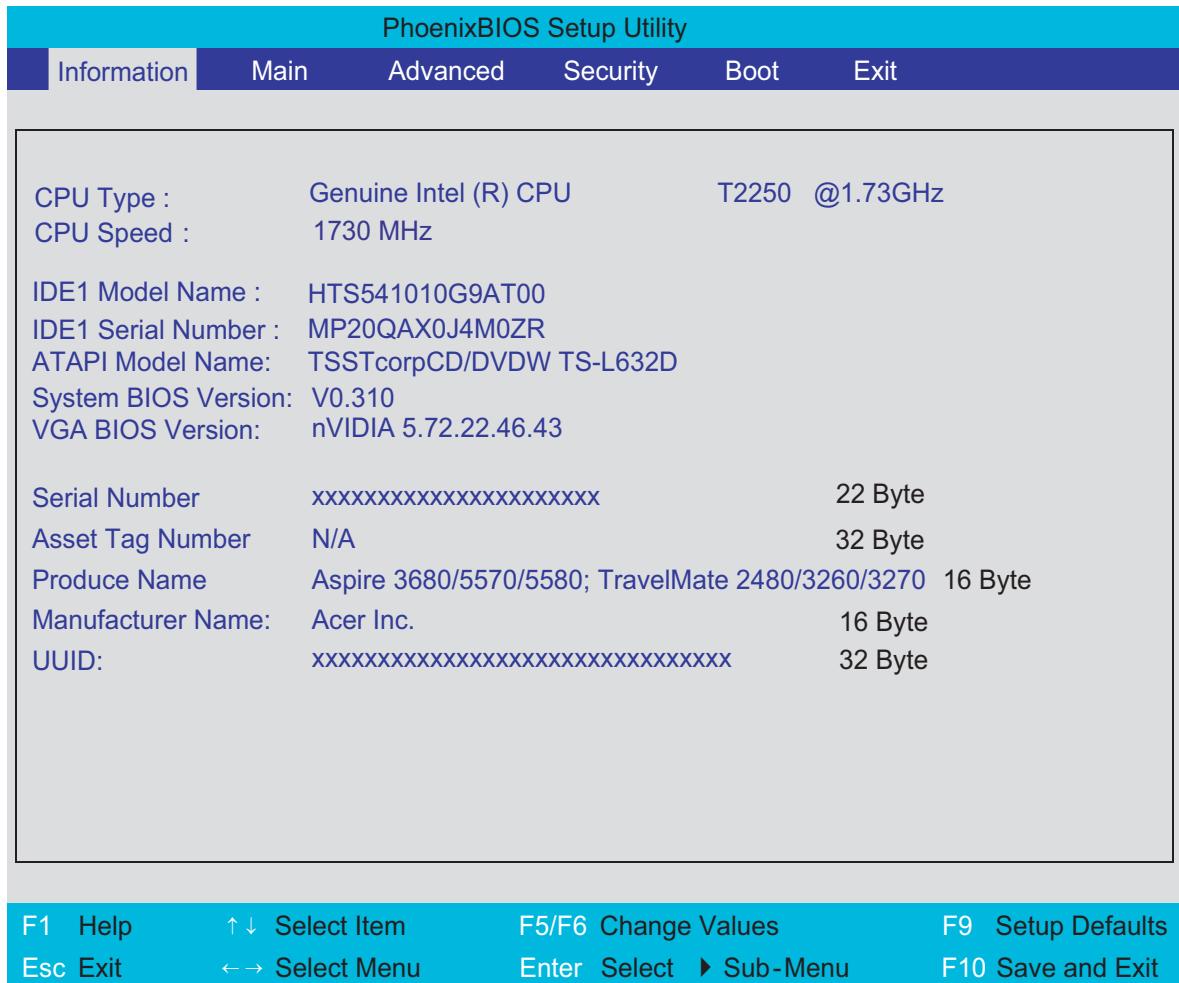

The BIOS Setup Utility is a hardware configuration program built into your computer's BIOS (Basic Input/Output System).

Your computer is already properly configured and optimized, and you do not need to run this utility. However, if you encounter configuration problems, you may need to run Setup. Please also refer to Chapter 4 Troubleshooting when problem arises.

To activate the BIOS Utility, press **F2** during POST (when “Press <F2> to enter Setup” message is prompted on the bottom of screen).

Press **F2** to enter setup. The default parameter of F12 Boot Menu is set to “disabled”. If you want to change boot device without entering BIOS Setup Utility, please set the parameter to “enabled”.

Press **<F12>** during POST to enter multi-boot menu. In this menu, user can change boot device without entering BIOS SETUP Utility.

---

## Navigating the BIOS Utility

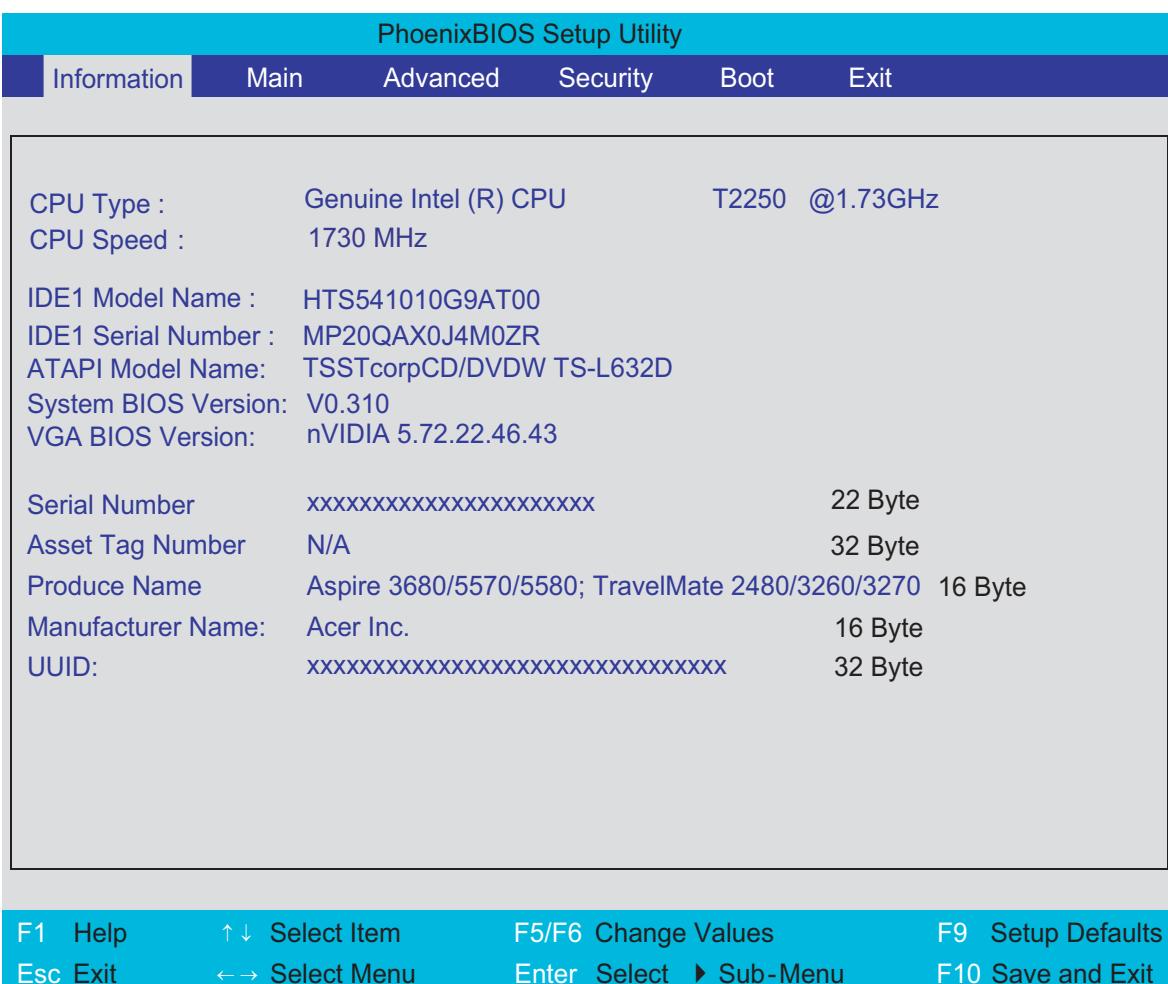

There are six menu options: Info., Main, System Devices, Security, Boot, and Exit.

Follow these instructions:

- To choose a menu, use the cursor left/right keys ( ).
- To choose a parameter, use the cursor up/down keys ( ).
- To change the value of a parameter, press  or .
- A plus sign (+) indicates the item has sub-items. Press  to expand this item.
- Press  while you are in any of the menu options to go to the Exit menu.
- In any menu, you can load default settings by pressing . You can also press  to save any changes made and exit the BIOS Setup Utility.

**NOTE:** You can change the value of a parameter if it is enclosed in square brackets. Navigation keys for a particular menu are shown on the bottom of the screen. Help for parameters are found in the Item Specific Help part of the screen. Read this carefully when making changes to parameter values. **Please note that system information is subject to different models.**

## Information

**NOTE:** The system information is subject to different models.

| Parameter          | Description   |
|--------------------|---|
| CPU Type           | This field shows the CPU type and speed of the system.  |
| IDE1 Model Name    | This field shows the model name of HDD installed on primary IDE master.   |
| IDE1 Serial Number | This field displays the serial number of HDD installed on primary IDE master.   |
| IDE2 Model Name    | This field displays the model name of devices installed on secondary IDE master. The hard disk drive or optical drive model name is automatically detected by the system. |
| IDE2 Serial Number | This field shows the serial number of devices installed on secondary IDE master.  |
| System BIOS ver    | Displays system BIOS version.   |
| VGA BIOS Ver       | This field displays the VGA firmware version of the system.   |
| KBC Ver            | This field shows the keyboard   |
| Serial Number      | This field displays the serial number of this unit.   |
| Asset Tag Number   | This field displays the asset tag number of the system.   |
| Product Name       | This field shows product name of the system.  |
| Manufacturer Name  | This field displays the manufacturer of this system.  |
| UUID Number        | This will be visible only when an internal LAN device is presenting.<br>UUID=32bytes  |

## Main

The Main screen displays a summary of your computer hardware information, and also includes basic setup parameters. It allows the user to specify standard IBM PC AT system parameters.

| PhoenixBIOS Setup Utility |              |  |
|---------------------------|--------------|--|
| Information               | Main         | Advanced   |

| System Date:              | [08/09/2006] |  |
| System Memory:            | 634 KB       |  |
| Extended Memory:          | 1022 MB      |  |
| Video Memory:             | 128MB        |  |
| Quiet Boot:               | [Enabled]    |  |
| Power on display:         | [Auto ]      |  |
| Network boot              | [Enabled]    |  |
| F12 Boot Menu             | [Disabled]   |  |
| D2D Recovery              | [Enabled]    |  |

|          |                |                         |                   |
|----------|----------------|-------------------------|-------------------|
| F1 Help  | ↑↓ Select Item | F5/F6 Change Values     | F9 Setup Defaults |
| Esc Exit | ↔ Select Menu  | Enter Select ▶ Sub-Menu | F10 Save and Exit |

**NOTE:** The screen above is for your reference only. Actual values may differ.

The table below describes the parameters in this screen. Settings in **boldface** are the default and suggested parameter settings.

| Parameter        | Description  | Format/Option  |
|------------------|--|--|
| System Time      | Sets the system time. The hours are displayed with 24-hour format.   | Format: HH:MM:SS<br>(hour:minute:second) System Time |
| System Date      | Sets the system date.  | Format MM/DD/YYYY (month/day/year)<br>System Date    |
| System Memory    | This field reports the memory size of the system.<br>Memory size is fixed to 640MB   |  |
| Extended Memory  | This field reports the memory size of the extended memory in the system.<br>Extended Memory size=Total memory size-1MB   |  |
| VGA Memory       | Shows the VGA memory size. VGA Memory size=64/128MB  |  |
| Quiet Boot       | Determines if Customer Logo will be displayed or not; shows Summary Screen is disabled or enabled.<br><br>Enabled: Customer Logo is displayed, and Summary Screen is disabled.<br><br>Disabled: Customer Logo is not displayed, and Summary Screen is enabled.   | Option: <b>Enabled</b> or Disabled                   |
| Power on display | Auto: During power process, the system will detect if any display device is connected on external video port. If any external display device is connected, the power on display will be in CRT (or projector) only mode. Otherwise it will be in LCD only mode.<br><br>Both: Simultaneously enable both the integrated LCD screen and the system's external video port (for an external CRT or projector). | Option: <b>Auto</b> or Both                          |
| Network Boot     | Enables, disables the system boot from LAN (remote server).  | Option: <b>Enabled</b> or Disabled                   |
| F12 Boot Menu    | Enables, disables Boot Menu during POST.   | Option: <b>Disabled</b> or Enabled                   |
| D2D Recovery     | Enables, disables D2D Recovery function. The function allows the user to create a hidden partition on hard disc drive to store operation system and restore the system to factory defaults.  | Option: <b>Enabled</b> or Disabled                   |

**NOTE:** The sub-items under each device will not be shown if the device control is set to disable or auto. This is because the user is not allowed to control the settings in these cases.

## Advanced

The Advanced screen displays advanced settings in BIOS.

**NOTE:** Please refer to “Remove HDD/BIOS Password” section if you need to know how to remove HDD/BIOS Password.

The table below describes the parameters in this screen. Settings in **boldface** are the default and suggested parameter settings.

| Parameter                 | Description  | Option                     |
|---------------------------|--|----------------------------|
| User Password is          | Shows the setting of the user password.  | <b>Clear</b> or Set        |
| Supervisor Password is    | Shows the setting of the Supervisor password   | <b>Clear</b> or Set        |
| Set User Password         | Press Enter to set the user password. When user password is set, this password protects the BIOS Setup Utility from unauthorized access. The user can enter Setup menu only and does not have right to change the value of parameters.               |                            |
| Set Supervisor Password   | Press Enter to set the supervisor password. When set, this password protects the BIOS Setup Utility from unauthorized access. The user can not either enter the Setup menu nor change the value of parameters.                                       |                            |
| Primary HardDisk Security | Enables or disables primary hard disk security function.   |                            |
| Password on Boot          | Defines whether a password is required or not while the events defined in this group happened. The following sub-options are all requires the Supervisor password for changes and should be grayed out if the user password was used to enter setup. | <b>Disabled</b> or Enabled |

**NOTE:** When you are prompted to enter a password, you have three tries before the system halts. Don't forget your password. If you forget your password, you may have to return your notebook computer to your dealer to reset it.

## Setting a Password

Follow these steps as you set the user or the supervisor password:

1. Use the **[↑]** and **[↓]** keys to highlight the Set Supervisor Password parameter and press the **[ENTER]** key. The Set Supervisor Password box appears:

|                         |     |
|-------------------------|-----|
| Set Supervisor Password |     |
| Enter New Password      | [ ] |
| Confirm New Password    | [ ] |

2. Type a password in the "Enter New Password" field. The password length can not exceeds 8 alphanumeric characters (A-Z, a-z, 0-9, not case sensitive). Retype the password in the "Confirm New Password" field.

**IMPORTANT:** Be very careful when typing your password because the characters do not appear on the screen.

3. Press **[ENTER]**. After setting the password, the computer sets the User Password parameter to "Set".
4. If desired, you can opt to enable the Password on boot parameter.
5. When you are done, press **[F10]** to save the changes and exit the BIOS Setup Utility.

## Removing a Password

Follow these steps:

1. Use the **↑** and **↓** keys to highlight the Set Supervisor Password parameter and press the **ENTER** key. The Set Password box appears:

|                         |   |   |
|-------------------------|---|---|
| Set Supervisor Password |   |   |
| Enter current password  | [ | ] |
| Enter New Password      | [ | ] |
| Confirm New Password    | [ | ] |

2. Type the current password in the Enter Current Password field and press **ENTER**.
3. Press **ENTER** twice **without** typing anything in the Enter New Password and Confirm New Password fields. The computer then sets the Supervisor Password parameter to “Clear”.
4. When you have changed the settings, press **F10** to save the changes and exit the BIOS Setup Utility.

## Changing a Password

1. Use the **↑** and **↓** keys to highlight the Set Supervisor Password parameter and press the **ENTER** key. The Set Password box appears:

|                         |   |   |
|-------------------------|---|---|
| Set Supervisor Password |   |   |
| Enter current password  | [ | ] |
| Enter New Password      | [ | ] |
| Confirm New Password    | [ | ] |

2. Type the current password in the Enter Current Password field and press **ENTER**.
3. Type a password in the Enter New Password field. Retype the password in the Confirm New Password field.
4. Press **ENTER**. After setting the password, the computer sets the User Password parameter to “Set”.
5. If desired, you can enable the Password on boot parameter.
6. When you are done, press **F10** to save the changes and exit the BIOS Setup Utility.

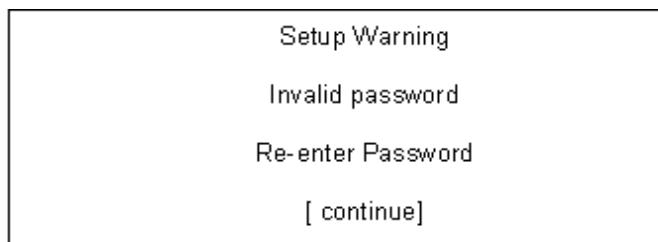

If the verification is OK, the screen will display as following.

|                          |  |  |
|--------------------------|--|--|
| Setup Notice             |  |  |
| Changes have been saved. |  |  |
| [ continue]              |  |  |

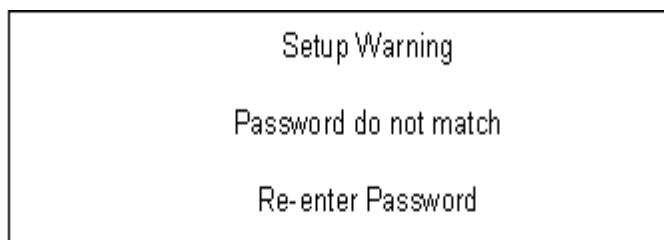

The password setting is complete after the user presses **F10**.

---

If the current password entered does not match the actual current password, the screen will show you the Setup Warning.

If the new password and confirm new password strings do not match, the screen will display the following message.

## Boot

This menu allows the user to decide the order of boot devices to load the operating system. Bootable devices includes the distette drive in module bay, the onboard hard disk drive and the CD-ROM in module bay.

| PhoenixBIOS Setup Utility   |                                    |  |      |  |
|---|------------------------------------|--|------|--|
| Information   | Main                               | Security                                       | Boot | Exit   |
| <p>Boot priority order:</p> <p>1: IDE 0: HTS541010G9AT00 - (PM)<br/>2: IDE CDROM: TSSTcorpCD/DVDW TS-L632D-<br/>3: Network Boot: B02 D00 Yukon PXE<br/>4: USB HDD:<br/>5: USB CD-ROM:<br/>6: USB Floppy:<br/>7: USB KEY:<br/>8:<br/>Excluded from boot order:</p> |                                    |  |      | Item Specific Help   |
|   |                                    |  |      | Keys used to view or configure device:<br>Use Up and Down arrows to select a device.<br><+> and <-> moves the device up or down.<br><f> and <r> specifies the device fixed or removable.<br><x> exclude or include the device to boot.<br><Shift +1> enables or disables a device.<br><1 - 4> Loads default boot sequence. |
| F1 Help<br>Esc Exit   | ↑ ↓ Select Item<br>← → Select Menu | F5/F6 Change Values<br>Enter Select ▶ Sub-Menu |      | F9 Setup Defaults<br>F10 Save and Exit   |

## Exit

The Exit screen contains parameters that help safeguard and protect your computer from unauthorized use.

| PhoenixBIOS Setup Utility   |                 |                         |                   |      |                    |
|---|-----------------|-------------------------|-------------------|------|--------------------|
| Information   | Main            | Advanced                | Security          | Boot | Exit               |
| <p>Exit Saving Changes<br/>Exit Discarding Changes<br/>Load Setup Defaults<br/>Discard Changes<br/>Save Changes</p> |                 |                         |                   |      | Item Specific Help |
| <p>Exit System Setup and save your changes to CMOS.</p>   |                 |                         |                   |      |                    |
| F1 Help   | ↑ ↓ Select Item | F5/F6 Change Values     | F9 Setup Defaults |      |                    |
| Esc Exit  | ← → Select Menu | Enter Select ▶ Sub-Menu | F10 Save and Exit |      |                    |

The table below describes the parameters in this screen.

| Parameter               | Description   |
|-------------------------|---|
| Exit Saving Changes     | Exit System Setup and save your changes to CMOS.    |
| Exit Discarding Changes | Exit utility without saving setup data to CMOS.     |
| Load Setup Default      | Load default values for all SETUP item.             |
| Discard Changes         | Load previous values from CMOS for all SETUP items. |
| Save Changes            | Save Setup Data to CMOS.                            |

---

# BIOS Flash Utility

The BIOS flash memory update is required for the following conditions:

- New versions of system programs
- New features or options
- Restore a BIOS when it becomes corrupted.

Use the Phlash utility to update the system BIOS flash ROM.

**NOTE:** If you do not have a crisis recovery diskette at hand, then you should create a **Crisis Recovery Diskette** before you use the Phlash utility.

**NOTE:** Do not install memory-related drivers (XMS, EMS, DPMI) when you use the Phlash.

**NOTE:** Please use the AC adaptor power supply when you run the Phlash utility. If the battery pack does not contain enough power to finish BIOS flash, you may not boot the system because the BIOS is not completely loaded.

Fellow the steps below to run the Phlash.

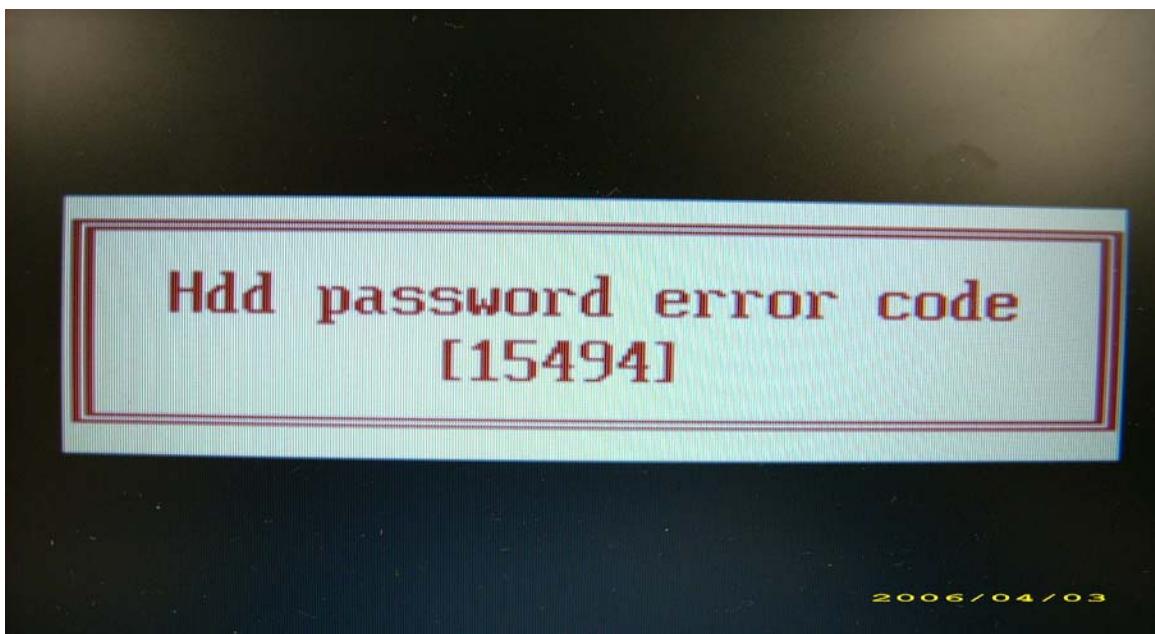

1. Prepare a bootable diskette.
2. Copy the flash utilities to the bootable diskette.
3. Then boot the system from the bootable diskette. The flash utility has auto-execution function.

# Remove HDD/BIOS Utility

This section provide you with removing HDD/BIOS method:

## Remove HDD Password:

- If you key in wrong HDD password for three time, “HDD password error code” would display on the screen. See the image below.

- If you need to solve HDD password locked problem, you can run HDD\_PW.EXE
  - 1. Key in "hdd\_pw 15494 0"
  - 2. Select "2"
  - 3. Choose one upper-case string

```
C:\WINDOWS\system32\cmd.exe
F:\>cd password
F:\password>dir/w
Volume in drive F has no label.
Volume Serial Number is D4F6-0236

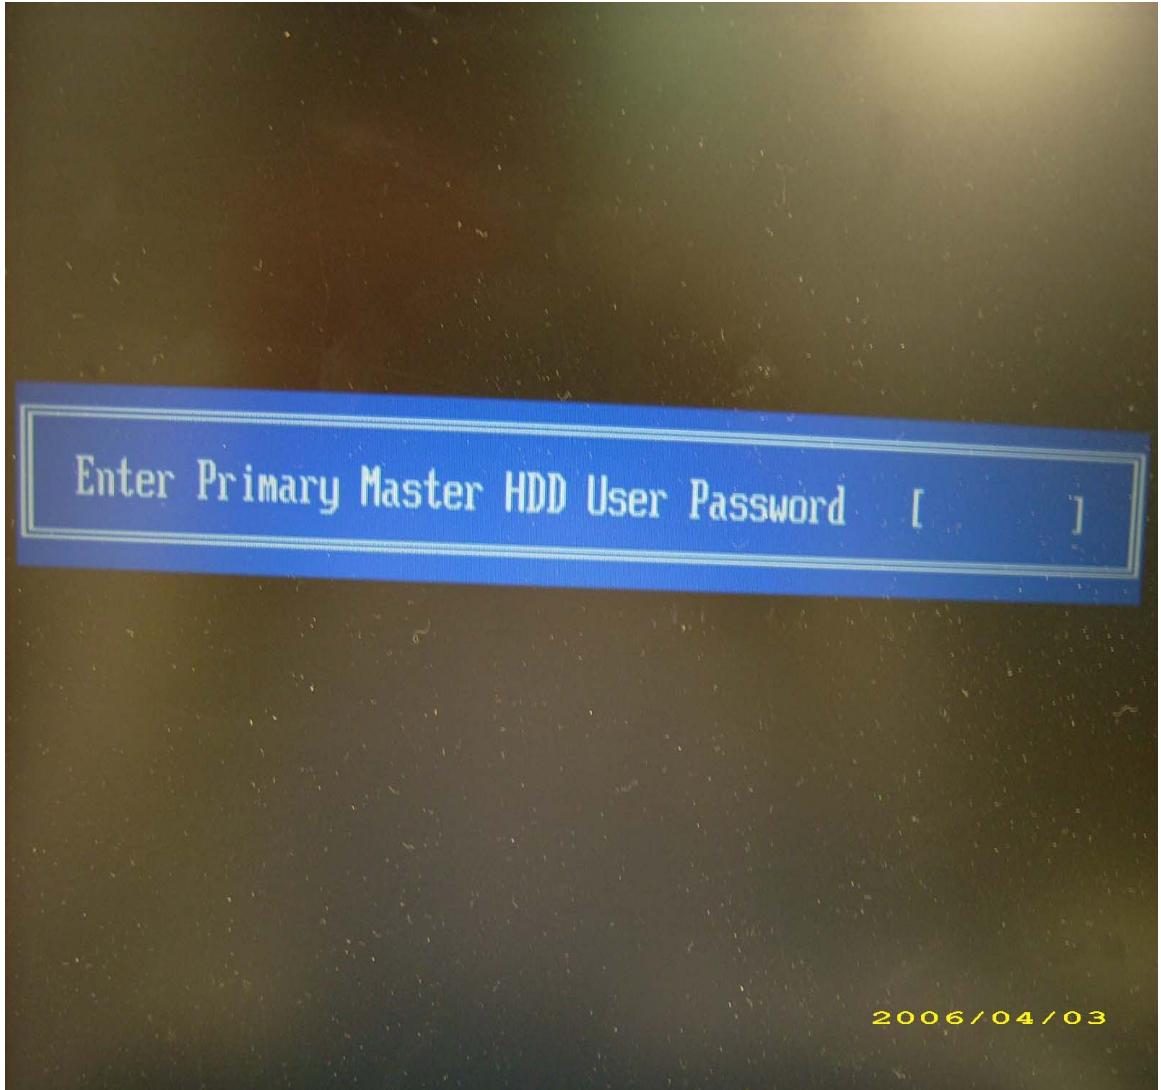

Directory of F:\password

[.]           [..]           BIOS_PW.EXE   HDD_PW.EXE
 1.          2 File(s)        35,354 bytes
 1.          2 Dir(s)       487,895,040 bytes free

F:\password>hdd_pw 15494 0
unlock6.exe v1.1 2 May 2003

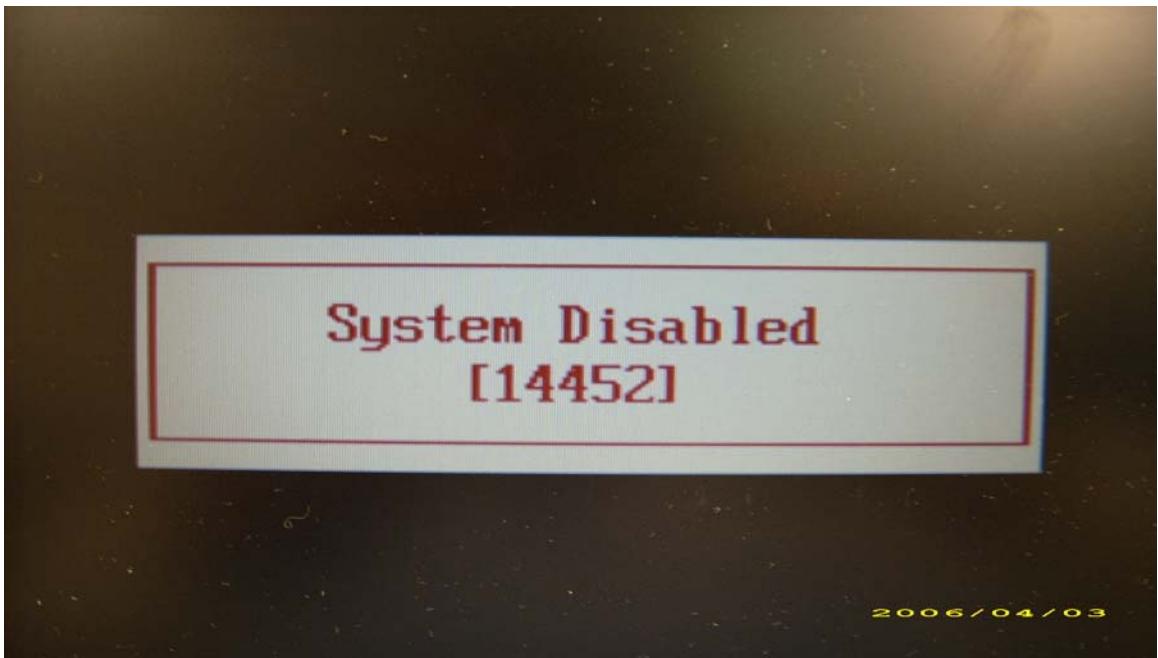

Choice what kind of the password to be generated:
0..> Exit....
1..> Scan Code
2..> Upper case ASCII Code
3..> Lower case ASCII Code
Enter your choice: 2
OKJFN42
UVEIQ96
F:\password>
```

- Reboot system and key in “OKJFN42” or “UVEIQ96” to HDD user password.

#### Remove BIOS Password:

- ❑ If you key in wrong Supervisor Password for three time, "System Disabled" would display on the screen. See the image below.

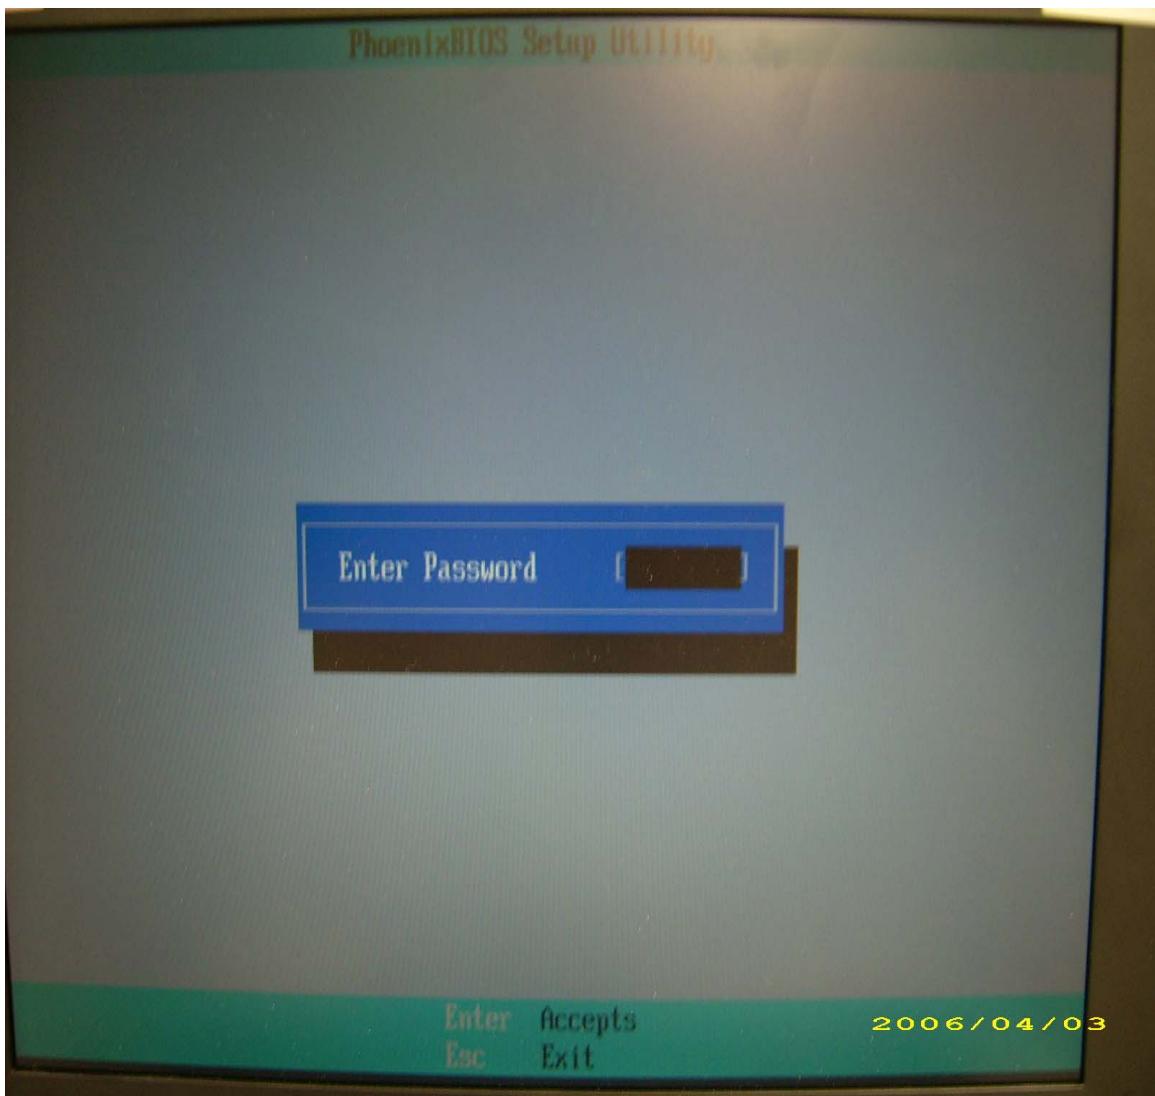

- If you need to solve BIOS password locked problem, you can run BIOS\_PW.EXE
- 1. Key in "bios\_pw 14452 0"
- 2. Choose one upper-case string

```
C:\WINDOWS\system32\cmd.exe
Microsoft Windows XP [Version 5.1.2600]
(C) Copyright 1985-2001 Microsoft Corp.

C:\Documents and Settings\M54>d:
D:>(bios_pw 14452 0) 1.
unlock6.exe v1.0 1 July 1997
qjjg9vy
07yqmjd
cjl14tm
6mbzja.j 2.

D:>_
```

- Reboot the system and key in "qjjg9vy" or "07yqmjd" to BIOS user password.

# Machine Disassembly and Replacement

---

This chapter contains step-by-step procedures on how to disassemble the notebook computer for maintenance and troubleshooting.

To disassemble the computer, you need the following tools:

- Wrist grounding strap and conductive mat for preventing electrostatic discharge
- Small Philips screw driver
- Philips screwdriver
- Plastic flat head screw driver
- Tweezers

**NOTE:** The screws for the different components vary in size. During the disassembly process, group the screws with the corresponding components to avoid mismatch when putting back the components. When you remove the stripe cover, please be careful not to scrape the cover.

---

## **General Information**

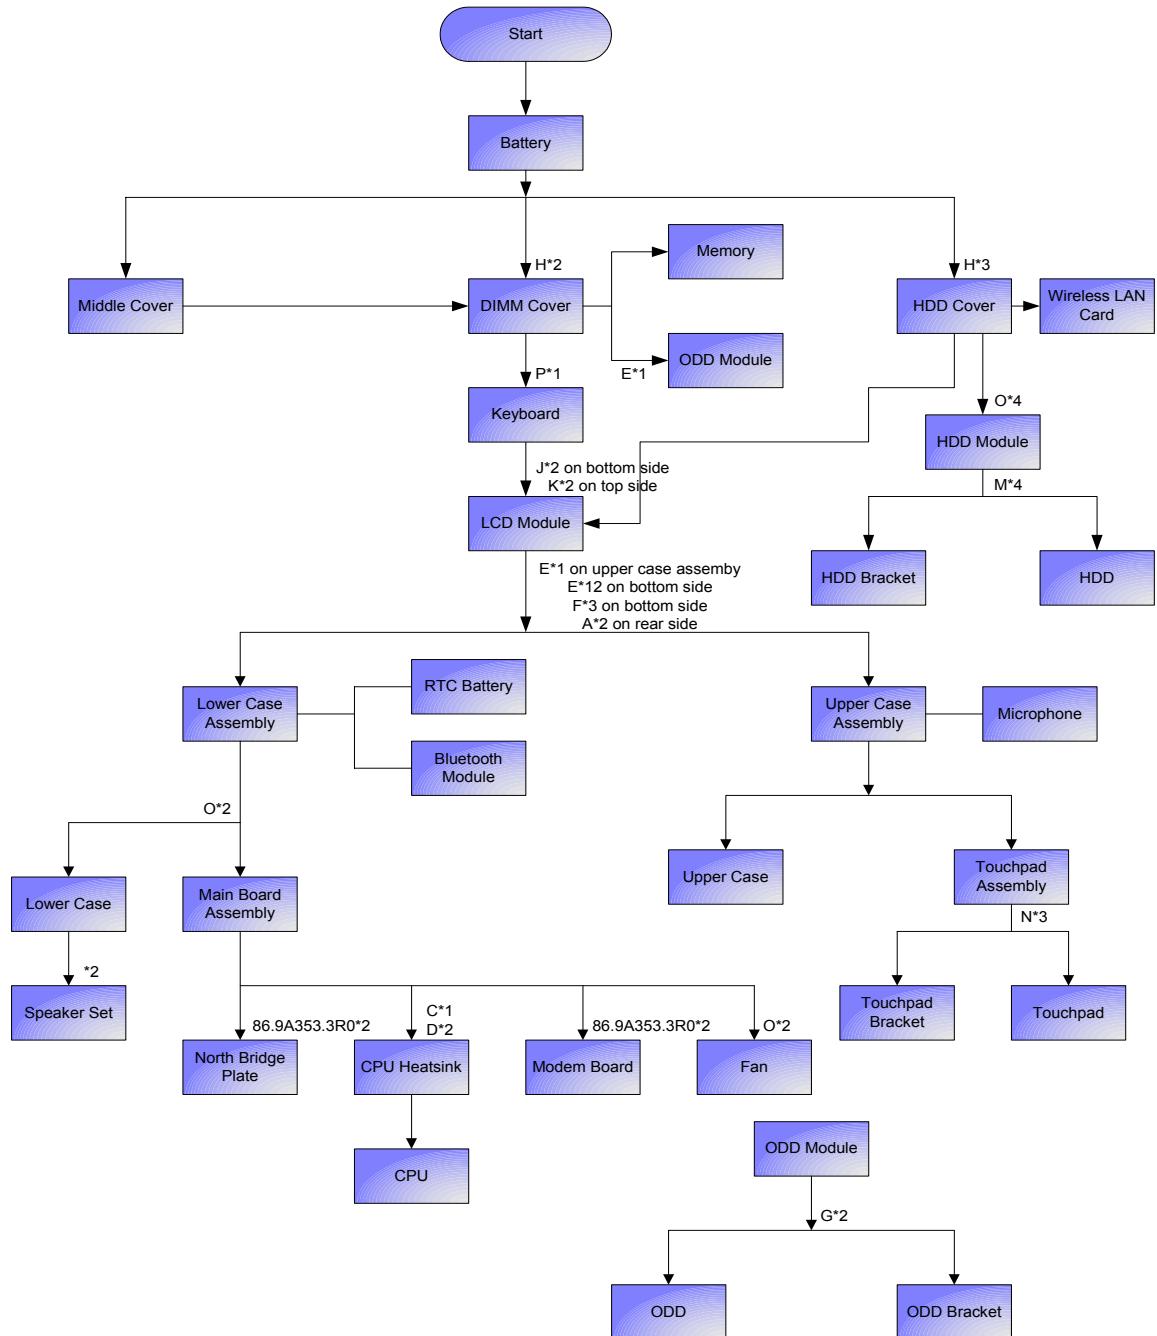

### **Before You Begin**

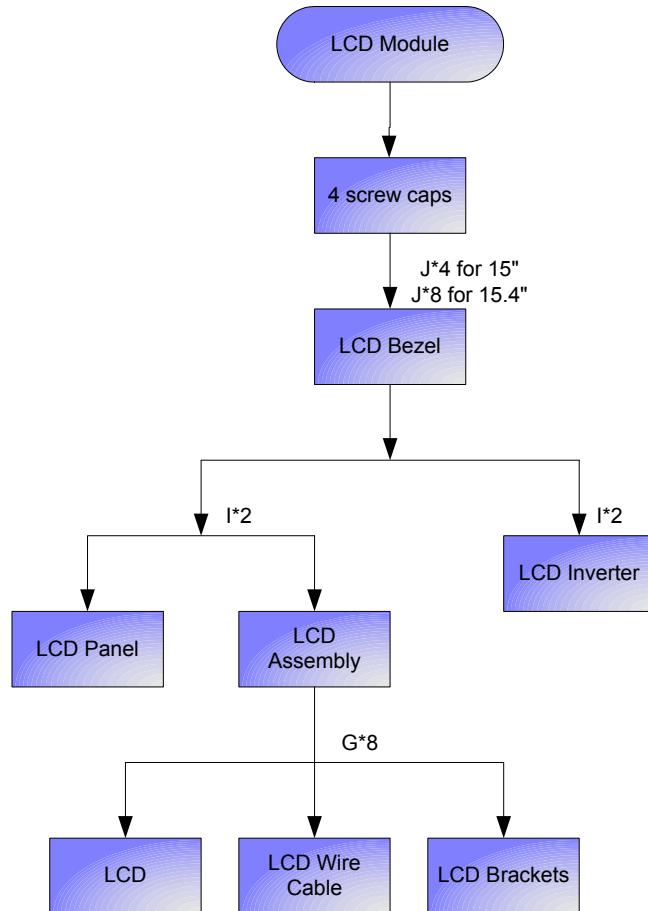

Before proceeding with the disassembly procedure, make sure that you do the following:

1. Turn off the power to the system and all peripherals.
2. Unplug the AC adapter and all power and signal cables from the system.
3. Remove the battery pack.

# Disassembly Procedure Flowchart

The flowchart on the succeeding page gives you a graphic representation on the entire disassembly sequence and instructs you on the components that need to be removed during servicing. For example, if you want to remove the system board, you must first remove the keyboard, then disassemble the inside assembly frame in that order.

### Screw List

| Item | Description                    | Part Number                    |
|------|--------------------------------|--------------------------------|
| A    | SCW HEX NYL I#R-40/O#4-40 L5.5 | 34.00015.081                   |
| B    | SCREW MACH WAFER M2*L4 NI      | 86.00059.220 (PC Card slot x4) |
| C    | CPU SCREW M2.5*4.3L (2.3 KG)   | 86.00D01.230                   |
| D    | CPU SCREW M2.5*4.3L (1.55 KG)  | 86.00D02.230                   |
| E    | SCREW M2.5-6                   | 86.9A323.6R0                   |
| F    | SCRW M2.5*L8(NON NYLOK)        | 86.9A323.8R0                   |
| G    | SCREW M2*3 NYLON 1JMCPC-420325 | 86.9A352.3R0                   |
| H    | SCREW                          | 86.9A352.4R0                   |
| I    | SCREW M2.5*4L(NYLOCK)BLACK ZN  | 86.9A353.4R0                   |
| J    | SCREW M2.5X6                   | 86.9A353.6R0                   |
| K    | SRW M2.5*8L B/ZN NYLOK 700     | 86.9A353.8R0                   |
| L    | SCRW M2.5*L3(NON NYLOK)        | 86.9A523.3R0                   |
| M    | SCREW M3x4(86.9A524.4R0)       | 86.9A524.4R0                   |

---

## Removing the Battery Pack

1. Unlock the battery lock.
2. Slide the battery latch then remove the battery.

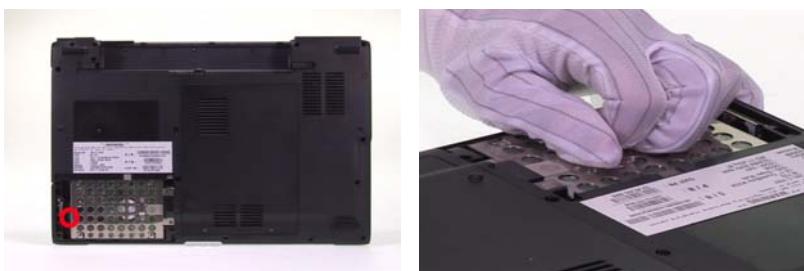

# **Removing the HDD Module/the Memory/the Wireless LAN Card/the Modem Board/the ODD Module and the LCD Module**

## **Removing the HDD Module**

1. Remove the two screws fastening the HDD cover.
2. Detach the HDD cover from the main unit.

3. Remove the screw holding the HDD module as shown.
4. Then disconnect the entire HDD module from the main unit.

## **Removing the Memory/the Wireless LAN Card/the Modem Board**

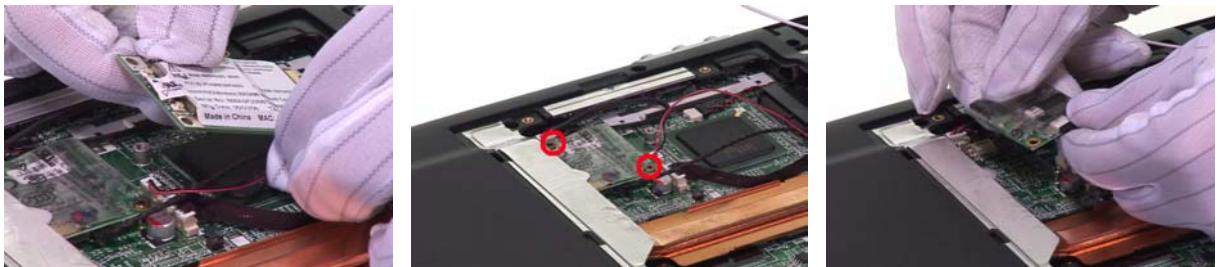

1. Remove the two screws fastening the RAM cover.
2. Detach the RAM cover from the main unit.

3. Pop out the memories and remove the memories from the memory sockets.
4. Disconnect the main and auxiliary wireless antennae from the wireless LAN card.
5. Remove the two screws fastening the wireless LAN card.

6. Remove the wireless LAN card from the socket.
7. Remove the two screws holding the modem board to the main board as shown.
8. Detach the modem board from the main board then disconnect the modem board cable.

## Removing the ODD Module

1. Remove one screw holding the ODD module on the bottom side.
2. Push the ODD module outwards then remove it.

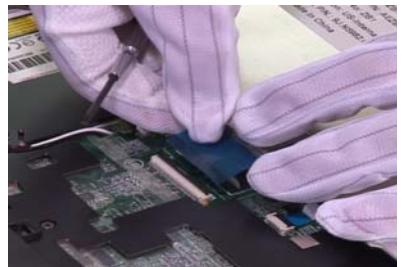

## Removing the LCD Module (including Keyboard)

1. Remove the two screws holding the keyboard cover to the main unit.
2. Open the LCD 180 degree as shown.
3. Carefully detach the keyboard cover from the main unit.

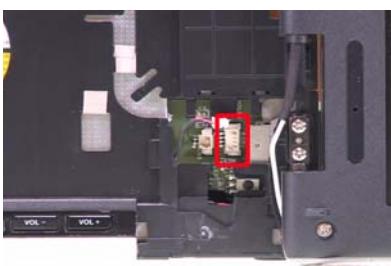

4. Remove the two screw fastening the keyboard to the upper case.
5. Disconnect the microphone cable from the launch board.

6. Take out the wireless LAN antenna set from the guide-line as shown.
7. Disconnect the LCD cable from the main board.
8. Disconnect the lid switch cable from the main board.

9. If your laptop has CCD module (web camera module), please disconnect CCD cable as shown.
10. Remove four screws holding the LCD module to the upper and lower case assembly.
11. Detach the entire LCD module.

## Disassembling the Main Unit

### Separating the Main Unit into Upper Case and Lower Case Assembly

1. Remove three screws fastening the upper case assembly and the lower case assembly.
2. Remove 18 screws (M2.5L6x17; M2.0L1.7x1) holding the upper assembly and the lower case assembly on the bottom.
3. Detach the upper case assembly from the lower case assembly.

### Disassembling the Upper Case Assembly

1. Remove the two screws fastening the media board.
2. Use a tweezers or a flat-headed screwdriver to detach the media board from the upper case.

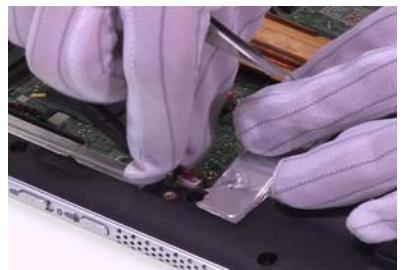

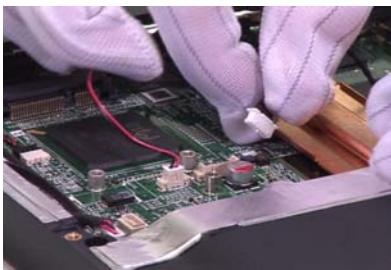

3. Take out the media board from the upper case.
4. Disconnect the media board FFC from the media board then remove the board and the FFC.

### Disassembling the Lower Case Assembly

1. Disconnect the Bluetooth cable from the main board.
2. Detach the Bluetooth module from the lower case and then detach the Bluetooth cable.
3. Disconnect the speaker cable from the main board.

4. Disconnect the microphone cable from the main board.
5. Remove the two screws fastening the main board to the lower case.
6. Carefully detach the main board from the lower case as shown.

7. Remove the two screws holding the daughter board to the main board.
8. Then detach the daughter board from the main board.
9. Disconnect the fan cable from the main board.

10. Remove the six screws fastening the thermal module.
11. Detach the thermal module from the main board.
12. Use a flat-bladed screwdriver to release the CPU lock then carefully remove the CPU. (Please turn anti-clockwise to release the CPU lock).

## Disassembling the LCD Module (with video camera)

1. Remove the six screw caps as shown.
2. Remove the six screws holding the LCD bezel.
3. Then detach the LCD bezel from the LCD module.

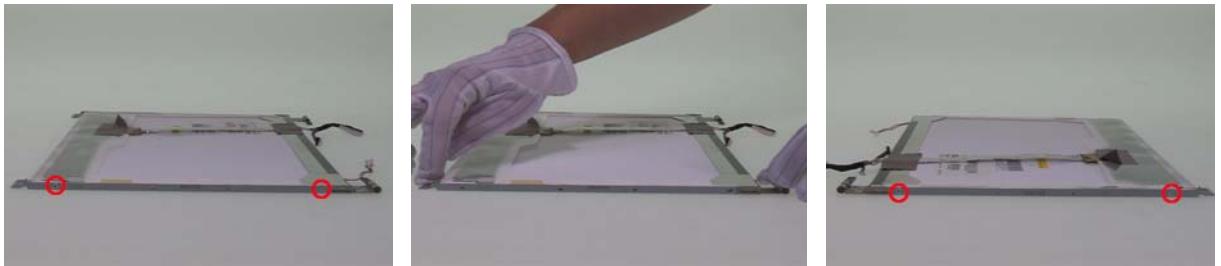

4. Take out the inverter from the LCD cover and disconnect the LVDS cable as shown.
5. Disconnect the inverter cable then take out the inverter.
6. Remove five screws holding the LCD assembly to the LCD cover.

7. Take out the LCD assembly from the LCD cover.
8. Remove the screws holding the CCD module.
9. Disconnect the CCD cable from the CCD module.

10. Remove the two screws holding the right LCD bracket.
11. Then remove the right LCD bracket.
12. Remove the two screws fastening the left LCD bracket.

13. Then remove the left LCD bracket from the LCD.

14. Tear off the mylar fastening the LCD cable.

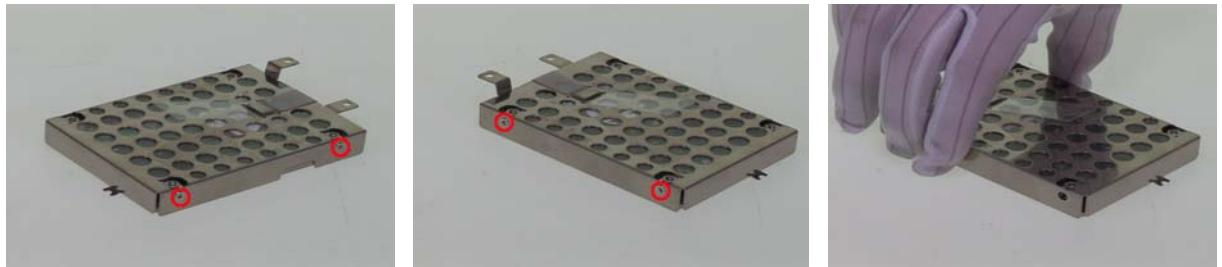

15. Disconnect the LCD cable from the LCD.

## Disassembling the External Modules

### Disassembling the HDD Module

1. Remove two screws holding the HDD bracket.
2. Then remove two screws fastening the HDD bracket on the other side.
3. Remove the HDD bracket.

### Disassembling the ODD Module

1. Remove the two screws holding the ODD bracket.
2. Then remove the ODD bracket.
3. Detach the ODD bezel carefully.

# Troubleshooting

Use the following procedure as a guide for computer problems.

**NOTE:** The diagnostic tests are intended to test only Acer products. Non-Acer products, prototype cards, or modified options can give false errors and invalid system responses.

1. Obtain the failing symptoms in as much detail as possible.
2. Verify the symptoms by attempting to re-create the failure by running the diagnostic test or by repeating the same operation.
3. Use the following table with the verified symptom to determine which page to go to.

| Symptoms (Verified)   | Go To  |
|---|--|
| Power failure. (The power indicator does not go on or stay on.) | "Power System Check" on page 81.   |
| POST does not complete. No beep or error codes are indicated.   | "Power-On Self-Test (POST) Error Message" on page 84<br>"Undetermined Problems" on page 96   |
| POST detects an error and displayed messages on screen.         | "Error Message List" on page 85  |
| Other symptoms (i.e. LCD display problems or others).           | "Power-On Self-Test (POST) Error Message" on page 84   |
| Symptoms cannot be re-created (intermittent problems).          | Use the customer-reported symptoms and go to<br>"Power-On Self-Test (POST) Error Message" on page 84<br>"Intermittent Problems" on page 95<br>"Undetermined Problems" on page 96 |

---

# System Check Procedures

## External Diskette Drive Check

Do the following to isolate the problem to a controller, driver, or diskette. A write-enabled, diagnostic diskette is required.

**NOTE:** Make sure that the diskette does not have more than one label attached to it. Multiple labels can cause damage to the drive or cause the drive to fail.

Do the following to select the test device.

1. Boot from the diagnostics diskette and start the diagnostics program.
2. See if FDD Test is passed as the program runs to FDD Test.
3. Follow the instructions in the message window.

If an error occurs with the internal diskette drive, reconnect the diskette connector on the system board.

If the error still remains:

1. Reconnect the external diskette drive/DVD-ROM module.
2. Replace the external diskette drive/CD-ROM module.
3. Replace the main board.

## External CD-ROM Drive Check

Do the following to isolate the problem to a controller, drive, or CD-ROM. Make sure that the CD-ROM does not have any label attached to it. The label can cause damage to the drive or can cause the drive to fail.

Do the following to select the test device:

1. Boot from the diagnostics diskette and start the diagnostics program.
2. See if CD-ROM Test is passed when the program runs to CD-ROM Test.
3. Follow the instructions in the message window.

If an error occurs, reconnect the connector on the System board. If the error still remains:

1. Reconnect the external diskette drive/CD-ROM module.
2. Replace the external diskette drive/CD-ROM module.
3. Replace the main board.

## Keyboard or Auxiliary Input Device Check

Remove the external keyboard if the internal keyboard is to be tested.

If the internal keyboard does not work or an unexpected character appears, make sure that the flexible cable extending from the keyboard is correctly seated in the connector on the system board.

If the keyboard cable connection is correct, run the Keyboard Test.

If the tests detect a keyboard problem, do the following one at a time to correct the problem. Do not replace a non-defective FRU:

1. Reconnect the keyboard cables.
2. Replace the keyboard.
3. Replace the main board.

The following auxiliary input devices are supported by this computer:

- Numeric keypad
- External keyboard

---

If any of these devices do not work, reconnect the cable connector and repeat the failing operation.

## **Memory check**

Memory errors might stop system operations, show error messages on the screen, or hang the system.

1. Boot from the diagnostics diskette and start the doagmpstotics program (please refer to main board).
2. Go to the diagnostic memory in the test items.
3. Press F2 in the test items.
4. Follow the instructions in the message window.

**NOTE:** Make sure that the DIMM is fully installed into the connector. A loose connection can cause an error.

## **Power System Check**

To verify the symptom of the problem, power on the computer using each of the following power sources:

1. Remove the battery pack.
2. Connect the power adapter and check that power is supplied.
3. Disconnect the power adapter and install the charged battery pack; then check that power is supplied by the battery pack.

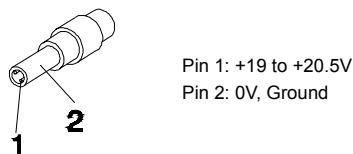

If you suspect a power problem, see the appropriate power supply check in the following list:

- “Check the Power Adapter” on page 82
- “Check the Battery Pack” on page 83

---

## Check the Power Adapter

Unplug the power adapter cable from the computer and measure the output voltage at the plug of the power adapter cable. See the following figure

1. If the voltage is not correct, replace the power adapter.
2. If the voltage is within the range, do the following:
  - Replace the System board.
  - If the problem is not corrected, see "Undetermined Problems" on page 96.
  - If the voltage is not correct, go to the next step.

**NOTE:** An audible noise from the power adapter does not always indicate a defect.

3. If the power-on indicator does not light up, check the power cord of the power adapter for correct continuity and installation.
4. If the operational charge does not work, see "Check the Battery Pack" on page 83.

## Check the Battery Pack

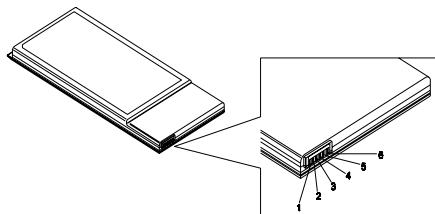

To check the battery pack, do the following:

From Software:

1. Check out the Power Management in control Panel
2. In Power Meter, confirm that if the parameters shown in the screen for Current Power Source and Total Battery Power Remaining are correct.
3. Repeat the steps 1 and 2, for both battery and adapter.
4. This helps you identify first the problem is on recharging or discharging.

From Hardware:

1. Power off the computer.
2. Remove the battery pack and measure the voltage between battery terminals 1(+) and 6(ground). See the following figure

3. If the voltage is still less than 7.5 Vdc after recharging, replace the battery.

To check the battery charge operation, use a discharged battery pack or a battery pack that has less than 50% of the total power remaining when installed in the computer.

If the battery status indicator does not light up, remove the battery pack and let it return to room temperature. Re-install the battery pack.

If the charge indicator still does not light up, replace the battery pack. If the charge indicator still does not light up, replace the DC/DC charger board.

## Touchpad Check

If the touchpad doesn't work, do the following actions one at a time to correct the problem. Do not replace a non-defective FRU:

1. Reconnect the touchpad cables.
2. Replace the touchpad.
3. Replace the system board.

After you use the touchpad, the pointer drifts on the screen for a short time. This self-acting pointer movement can occur when a slight, steady pressure is applied to the touchpad pointer. This symptom is not a hardware problem. No service actions are necessary if the pointer movement stops in a short period of time.

---

# Power-On Self-Test (POST) Error Message

The POST error message index lists the error message and their possible causes. The most likely cause is listed first.

**NOTE:** Perform the FRU replacement or actions in the sequence shown in FRU/Action column, if the FRU replacement does not solve the problem, put the original part back in the computer. Do not replace a non-defective FRU.

This index can also help you determine the next possible FRU to be replaced when servicing a computer.

If the symptom is not listed, see “Undetermined Problems” on page 96.

The following lists the error messages that the BIOS displays on the screen and the error symptoms classified by function.

**NOTE:** Most of the error messages occur during POST. Some of them display information about a hardware device, e.g., the amount of memory installed. Others may indicate a problem with a device, such as the way it has been configured.

**NOTE:** If the system fails after you make changes in the BIOS Setup Utility menus, reset the computer, enter Setup and install Setup defaults or correct the error.

# Index of Error Messages

## Error Code List

| Error Codes     | Error Messages  |
|-----------------|---|
| 006             | <p>Equipment Configuration Error<br/>         Causes:<br/>         1. CPU BIOS Update Code Mismatch<br/>         2. IDE Primary Channel Master Drive Error<br/>         (The causes will be shown before "Equipment Configuration Error")</p> |
| 010             | Memory Error at xxxx:xxxx:xxxxh (R:xxxxh, W:xxxxh)  |
| 070             | Real Time Clock Error   |
| 071             | CMOS Battery Bad  |
| 072             | CMOS Checksum Error   |
| 110             | <p>System disabled.<br/>         Incorrect password is specified.</p>   |
| <No error code> | <p>Battery critical LOW<br/>         In this situation BIOS will issue 4 short beeps then shut down system, no message will show.</p>   |
| <No error code> | <p>Thermal critical High<br/>         In this situation BIOS will shut down system, not show message.</p>   |

## Error Message List

| Error Messages  | FRU/Action in Sequence   |
|---|--|
| Failure Fixed Disk                                    | <p>Reconnect hard disk drive connector.<br/>         "Load Default Settings" in BIOS Setup Utility.<br/>         Hard disk drive<br/>         System board</p> |
| Stuck Key   | see "Keyboard or Auxiliary Input Device Check" on page 80.   |
| Keyboard error  | see "Keyboard or Auxiliary Input Device Check" on page 80.   |
| Keyboard Controller Failed                            | see "Keyboard or Auxiliary Input Device Check" on page 80.   |
| Keyboard locked - Unlock key switch                   | Unlock external keyboard   |
| Monitor type does not match CMOS - Run Setup          | Run "Load Default Settings" in BIOS Setup Utility.   |
| Shadow RAM Failed at offset: nnnn                     | <p>BIOS ROM<br/>         System board</p>  |
| System RAM Failed at offset: nnnn                     | <p>DIMM<br/>         System board</p>  |
| Extended RAM Failed at offset: nnnn                   | <p>DIMM<br/>         System board</p>  |
| System battery is dead - Replace and run Setup        | Replace RTC battery and Run BIOS Setup Utility to reconfigure system time, then reboot system.   |
| System CMOS checksum bad - Default configuration used | <p>RTC battery<br/>         Run BIOS Setup Utility to reconfigure system time, then reboot system.</p>   |
| System timer error                                    | <p>RTC battery<br/>         Run BIOS Setup Utility to reconfigure system time, then reboot system.<br/>         System board</p>                               |

## Error Message List

| Error Messages  | FRU/Action in Sequence  |
|---|---|
| Real time clock error                                 | RTC battery<br>Run BIOS Setup Utility to reconfigure system time, then reboot system.<br>System board                             |
| Previous boot incomplete - Default configuration used | Run "Load Default Settings" in BIOS Setup Utility.<br>RTC battery<br>System board   |
| Memory size found by POST differed from CMOS          | Run "Load Default Settings" in BIOS Setup Utility.<br>DIMM<br>System board  |
| Diskette drive A error                                | Check the drive is defined with the proper diskette type in BIOS Setup Utility<br>See "External Diskette Drive Check" on page 80. |
| Incorrect Drive A type - run SETUP                    | Check the drive is defined with the proper diskette type in BIOS Setup Utility  |
| System cache error - Cache disabled                   | System board  |
| CPU ID:   | System board  |
| DMA Test Failed                                       | DIMM<br>System board  |
| Software NMI Failed                                   | DIMM<br>System board  |
| Fail-Safe Timer NMI Failed                            | DIMM<br>System board  |
| Device Address Conflict                               | Run "Load Default Settings" in BIOS Setup Utility.<br>RTC battery<br>System board   |
| Allocation Error for device                           | Run "Load Default Settings" in BIOS Setup Utility.<br>RTC battery<br>System board   |
| Failing Bits: nnnn                                    | DIMM<br>BIOS ROM<br>System board  |
| Fixed Disk n  | None  |
| Invalid System Configuration Data                     | BIOS ROM<br>System board  |
| I/O device IRQ conflict                               | Run "Load Default Settings" in BIOS Setup Utility.<br>RTC battery<br>System board   |
| Operating system not found                            | Enter Setup and see if fixed disk and drive A: are properly identified.<br>Diskette drive<br>Hard disk drive<br>System board      |

## Error Message List

| No beep Error Messages  | FRU/Action in Sequence  |
|---|---|
| No beep, power-on indicator turns off and LCD is blank.   | Power source (battery pack and power adapter). See "Power System Check" on page 81..<br>Ensure every connector is connected tightly and correctly.<br>Reconnect the DIMM.<br>LED board.<br>System board.      |
| No beep, power-on indicator turns on and LCD is blank.  | Power source (battery pack and power adapter). See "Power System Check" on page 81..<br>Reconnect the LCD connector<br>Hard disk drive<br>LCD inverter ID<br>LCD cable<br>LCD Inverter<br>LCD<br>System board |
| No beep, power-on indicator turns on and LCD is blank. But you can see POST on an external CRT. | Reconnect the LCD connectors.<br>LCD inverter ID<br>LCD cable<br>LCD inverter<br>LCD<br>System board  |
| No beep, power-on indicator turns on and a blinking cursor shown on LCD during POST.            | Ensure every connector is connected tightly and correctly.<br>System board  |
| No beep during POST but system runs correctly.  | Speaker<br>System board   |

# Phoenix BIOS Beep Codes

| Code | Beeps   | POST Routine Description                                 |
|------|---------|--|
| 02h  |         | Verify Real Mode   |
| 03h  |         | Disable Non-Maskable Interrupt (NMI)                     |
| 04h  |         | Get CPU type   |
| 06h  |         | Initialize system hardware                               |
| 08h  |         | Initialize chipset with initial POST values              |
| 09h  |         | Set IN POST flag   |
| 0Ah  |         | Initialize CPU registers                                 |
| 0Bh  |         | Enable CPU cache   |
| 0Ch  |         | Initialize caches to initial POST values                 |
| 0Eh  |         | Initialize I/O component                                 |
| 0Fh  |         | Initialize the local bus IDE                             |
| 10h  |         | Initialize Power Management                              |
| 11h  |         | Load alternate registers with initial POST values        |
| 12h  |         | Restore CPU control word during warm boot                |
| 13h  |         | Initialize PCI Bus Mastering devices                     |
| 14h  |         | Initialize keyboard controller                           |
| 16h  | 1-2-2-3 | BIOS ROM checksum  |
| 17h  |         | Initialize cache before memory autosize                  |
| 18h  |         | 8254 timer initialization                                |
| 1Ah  |         | 8237 DMA controller initialization                       |
| 1Ch  |         | Reset Programmable Interrupt Controller                  |
| 20h  | 1-3-1-1 | Test DRAM refresh  |
| 22h  | 1-3-1-3 | Test 8742 Keyboard Controller                            |
| 24h  |         | Set ES segment register to 4 GB                          |
| 26h  |         | Enable A20 line  |
| 28h  |         | Autosize DRAM  |
| 29h  |         | Initialize POST Memory Manager                           |
| 2Ah  |         | Clear 215 KB base RAM                                    |
| 2Ch  | 1-3-4-1 | RAM failure on address line xxxx                         |
| 2Eh  | 1-3-4-3 | RAM failure on data bits xxxx of low byte of memory bus  |
| 2Fh  |         | Enable cache before system BIOS shadow                   |
| 30h  | 1-4-1-1 | RAM failure on data bits xxxx of high byte of memory bus |
| 32h  |         | Test CPU bus-clock frequency                             |
| 33h  |         | Initialize Phoenix Dispatch Manager                      |
| 36h  |         | Warm start shut down                                     |
| 38h  |         | Shadow system BIOS ROM                                   |
| 3Ah  |         | Autosize cache   |
| 3Ch  |         | Advanced configuration of chipset registers              |
| 3Dh  |         | Load alternate registers with CMOS values                |
| 42h  |         | Initialize interrupt vectors                             |
| 45h  |         | POST device initialization                               |

| <b>Code</b> | <b>Beeps</b> | <b>POST Routine Description</b>                       |
|-------------|--------------|---|
| 46h         | 2-1-2-3      | Check ROM copyright notice                            |
| 48h         |              | Check video configuration against CMOS                |
| 49h         |              | Initialize PCI bus and devices                        |
| 4Ah         |              | Initialize all video adapters in system               |
| 4Bh         |              | QuietBoot start (optional)                            |
| 4Ch         |              | Shadow video BIOS ROM                                 |
| 4Eh         |              | Display BIOS copyright notice                         |
| 50h         |              | Display CPU type and speed                            |
| 51h         |              | Initialize EISA board                                 |
| 52h         |              | Test keyboard   |
| 54h         |              | Set key click if enabled                              |
| 58h         | 2-2-3-1      | Test for unexpected interrupts                        |
| 59h         |              | Initialize POST display service                       |
| 5Ah         |              | Display prompt "Press F2 to enter SETUP"              |
| 5Bh         |              | Disable CPU cache                                     |
| 5Ch         |              | Test RAM between 512 and 640 KB                       |
| 60h         |              | Test extended memory                                  |
| 62h         |              | Test extended memory address lines                    |
| 64h         |              | Jump to User Patch1                                   |
| 66h         |              | Configure advanced cache registers                    |
| 67h         |              | Initialize Multi Processor APIC                       |
| 68h         |              | Enable external and CPU caches                        |
| 69h         |              | Setup System Management Mode (SMM) area               |
| 6Ah         |              | Display external L2 cache size                        |
| 6Bh         |              | Load custom defaults (optional)                       |
| 6Ch         |              | Display shadow-area message                           |
| 6Eh         |              | Display possible high address for UMB recovery        |
| 70h         |              | Display error messages                                |
| 72h         |              | Check for configuration errors                        |
| 76h         |              | Check for keyboard errors                             |
| 7Ch         |              | Set up hardware interrupt vectors                     |
| 7Eh         |              | Initialize coprocessor if present                     |
| 80h         |              | Disable onboard Super I/O ports and IRQs              |
| 81h         |              | Late POST device initialization                       |
| 82h         |              | Detect and install external RS232 ports               |
| 83h         |              | Configure non-MCD IDE controllers                     |
| 84h         |              | Detect and install external parallel ports            |
| 85h         |              | Initialize PC-compatible PnP ISA devices              |
| 86h         |              | Re-initialize onboard I/O ports                       |
| 87h         |              | Configure Motherboard Configurable Devices (optional) |
| 88h         |              | Initialize BIOS Area                                  |
| 89h         |              | Enable Non-Maskable Interrupts (NMIs)                 |
| 8Ah         |              | Initialize Extended BIOS Data Area                    |
| 8Bh         |              | Test and initialize PS/2 mouse                        |

| <b>Code</b> | <b>Beeps</b> | <b>POST Routine Description</b>  |
|-------------|--------------|--|
| 8Ch         |              | Initialize floppy controller   |
| 8Fh         |              | Determine number of ATA drives (optional)                              |
| 90h         |              | Initialize hard-disk controllers                                       |
| 91h         |              | Initialize local-bus hard-disk controllers                             |
| 92h         |              | Jump to UserPatch2   |
| 93h         |              | Build MPTABLE for multi-processor boards                               |
| 95h         |              | Install CD ROM for boot  |
| 96h         |              | Clear huge ES segment register   |
| 97h         |              | Fixup Multi Processor table  |
| 98h         | 1-2          | Search for option ROMs. One long, two short beeps on checksum failure. |
| 99h         |              | Check for SMART drive (optional)                                       |
| 9Ah         |              | Shadow option ROMs   |
| 9Ch         |              | Set up Power Management  |
| 9Dh         |              | Initialize security engine (optional)                                  |
| 9Eh         |              | Enable hardware interrupts   |
| 9Fh         |              | Determine number of ATA and SCSI drives                                |
| A0h         |              | Set time of day  |
| A2h         |              | Check key lock   |
| A4h         |              | Initialize Typematic rate  |
| A8h         |              | Erase F2 prompt  |
| AAh         |              | Scan for F2 key stroke   |
| ACh         |              | Enter SETUP  |
| AEh         |              | Clear Boot flag  |
| B0h         |              | Check for errors   |
| B2h         |              | POST done- prepare to boot operating system                            |
| B4h         | 1            | One short beep before boot   |
| B5h         |              | Terminate QuietBoot (optional)   |
| B6h         |              | Check password (optional)  |
| B9h         |              | Prepare Boot   |
| BAh         |              | Initialize DMI parameters  |
| BBh         |              | Initialize PnP Option ROMs   |

# Index of Symptom-to-FRU Error Message

## LCD-Related Symptoms

| Symptom / Error   | Action in Sequence   |
|---|--|
| LCD backlight doesn't work<br>LCD is too dark<br>LCD brightness cannot be adjusted<br>LCD contrast cannot be adjusted | Enter BIOS Utility to execute "Load Setup Default Settings", then reboot system.<br>Reconnect the LCD connectors.<br>Keyboard (if contrast and brightness function key doesn't work).<br>LCD inverter ID<br>LCD cable<br>LCD inverter<br>LCD<br>System board |
| Unreadable LCD screen<br>Missing pels in characters<br>Abnormal screen<br>Wrong color displayed                       | Reconnect the LCD connector<br>LCD inverter ID<br>LCD cable<br>LCD inverter<br>LCD<br>System board   |
| LCD has extra horizontal or vertical lines displayed.   | LCD inverter ID<br>LCD inverter<br>LCD cable<br>LCD<br>System board  |

## Indicator-Related Symptoms

| Symptom / Error  | Action in Sequence   |
|--|--|
| Indicator incorrectly remains off or on, but system runs correctly | Reconnect the inverter board<br>Inverter board<br>System board |

## Power-Related Symptoms

| Symptom / Error                   | Action in Sequence  |
|-----------------------------------|---|
| Power shuts down during operation | Power source (battery pack and power adapter). See "Power System Check" on page 81.<br>Battery pack<br>Power adapter<br>Hard drive & battery connection board<br>System board |
| The system doesn't power-on.      | Power source (battery pack and power adapter). See "Power System Check" on page 81.<br>Battery pack<br>Power adapter<br>Hard drive & battery connection board<br>System board |
| The system doesn't power-off.     | Power source (battery pack and power adapter). See "Power System Check" on page 81.<br>Hold and press the power switch for more than 4 seconds.<br>System board               |

## **Power-Related Symptoms**

| Symptom / Error          | Action in Sequence   |
|--------------------------|--|
| Battery can't be charged | See "Check the Battery Pack" on page 83.<br>Battery pack<br>System board |

## **PCMCIA-Related Symptoms**

| Symptom / Error                           | Action in Sequence                   |
|---|--------------------------------------|
| System cannot detect the PC Card (PCMCIA) | PCMCIA slot assembly<br>System board |
| PCMCIA slot pin is damaged.               | PCMCIA slot assembly                 |

## **Memory-Related Symptoms**

| Symptom / Error   | Action in Sequence  |
|---|---|
| Memory count (size) appears different from actual size. | Enter BIOS Setup Utility to execute "Load Default Settings, then reboot system.<br>DIMM<br>System board |

## **Speaker-Related Symptoms**

| Symptom / Error  | Action in Sequence                      |
|--|---|
| In Windows, multimedia programs, no sound comes from the computer. | Audio driver<br>Speaker<br>System board |
| Internal speakers make noise or emit no sound.                     | Speaker<br>System board                 |

## **Power Management-Related Symptoms**

| Symptom / Error  | Action in Sequence  |
|--|---|
| The system will not enter hibernation  | See "Save to Disk (S4)" on page 45.<br>Keyboard (if control is from the keyboard)<br>Hard disk drive<br>System board  |
| The system doesn't enter hibernation mode and four short beeps every minute. | Press Fn+  and see if the computer enters hibernation mode.<br>Touchpad<br>Keyboard<br>Hard disk connection board<br>Hard disk drive<br>System board |
| The system doesn't enter standby mode after closing the LCD                  | See "Save to Disk (S4)" on page 45.<br>LCD cover switch<br>System board   |
| The system doesn't resume from hibernation mode.                             | See "Save to Disk (S4)" on page 45.<br>Hard disk connection board<br>Hard disk drive<br>System board  |
| The system doesn't resume from standby mode after opening the LCD.           | See "Save to Disk (S4)" on page 45.<br>LCD cover switch<br>System board   |

## Power Management-Related Symptoms

| Symptom / Error   | Action in Sequence   |
|---|--|
| Battery fuel gauge in Windows doesn't go higher than 90%. | Remove battery pack and let it cool for 2 hours.<br>Refresh battery (continue use battery until power off, then charge battery).<br>Battery pack<br>System board |
| System hangs intermittently.                              | Reconnect hard disk/CD-ROM drives.<br>Hard disk connection board<br>System board   |

## Peripheral-Related Symptoms

| Symptom / Error  | Action in Sequence  |
|--|---|
| System configuration does not match the installed devices. | Enter BIOS Setup Utility to execute "Load Default Settings", then reboot system.<br>Reconnect hard disk/CD-ROM/diskette drives.   |
| External display does not work correctly.                  | Press Fn+F5, LCD/CRT/Both display switching<br>System board   |
| USB does not work correctly                                | System board  |
| Print problems.  | Ensure the "Parallel Port" in the "Onboard Devices Configuration" of BIOS Setup Utility is set to Enabled.<br>Onboard Devices Configuration<br>Run printer self-test.<br>Printer driver<br>Printer cable<br>Printer<br>System Board |
| Serial or parallel port device problems.                   | Ensure the "Serial Port" in the "Devices Configuration" of BIOS Setup Utility is set to Enabled.<br>Device driver<br>Device cable<br>Device<br>System board   |

## Keyboard/Touchpad-Related Symptoms

| Symptom / Error                            | Action in Sequence  |
|--|---|
| Keyboard (one or more keys) does not work. | Reconnect the keyboard cable.<br>Keyboard<br>System board   |
| Touchpad does not work.                    | Reconnect touchpad cable.<br>Touchpad board<br>System board |

## Modem-Related Symptoms

| Symptom / Error                         | Action in Sequence                                    |
|---|---|
| Internal modem does not work correctly. | Modem phone port<br>modem combo board<br>System board |

**NOTE:** If you cannot find a symptom or an error in this list and the problem remains, see "Undetermined Problems" on page 96.

---

## Intermittent Problems

Intermittent system hang problems can be caused by a variety of reasons that have nothing to do with a hardware defect, such as: cosmic radiation, electrostatic discharge, or software errors. FRU replacement should be considered only when a recurring problem exists.

When analyzing an intermittent problem, do the following:

1. Run the advanced diagnostic test for the system board in loop mode at least 10 times.
2. If no error is detected, do not replace any FRU.
3. If any error is detected, replace the FRU. Rerun the test to verify that there are no more errors.

---

# Undetermined Problems

The diagnostic problems does not identify which adapter or device failed, which installed devices are incorrect, whether a short circuit is suspected, or whether the system is inoperative.

Follow these procedures to isolate the failing FRU (do not isolate non-defective FRU).

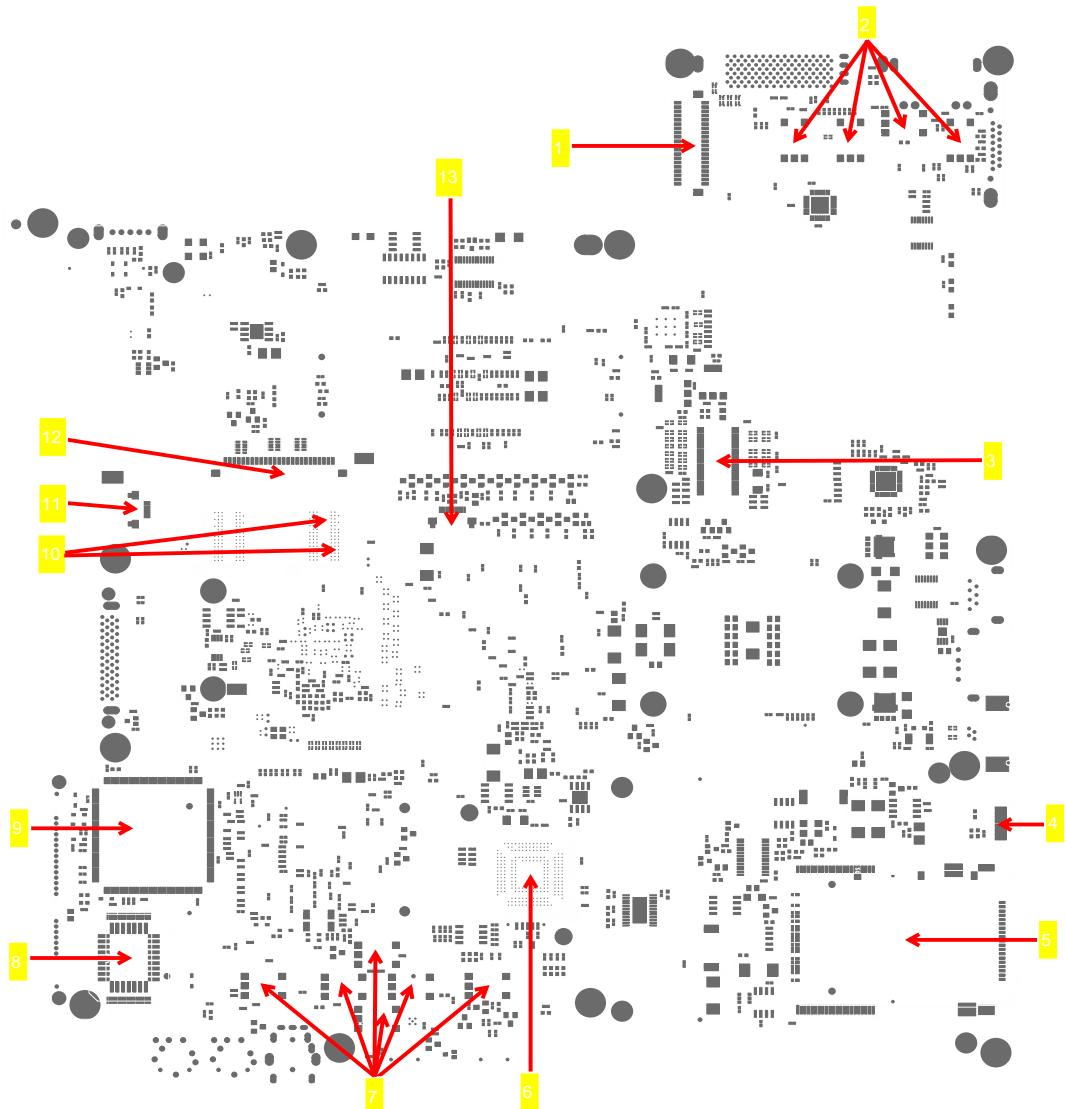

**NOTE:** Verify that all attached devices are supported by the computer.

**NOTE:** Verify that the power supply being used at the time of the failure is operating correctly. (See "Power System Check" on page 81.).

1. Power-off the computer.
2. Visually check them for damage. If any problems are found, replace the FRU.
3. Remove or disconnect all of the following devices:
  - Non-Acer devices
  - Printer, mouse, and other external devices
  - Battery pack
  - Hard disk drive
  - DIMM
  - CD-ROM/Diskette drive Module
  - PC Cards
4. Power-on the computer.
5. Determine if the problem has changed.
6. If the problem does not recur, reconnect the removed devices one at a time until you find the failing FRU.
7. If the problem remains, replace the following FRU one at a time. Do not replace a non-defective FRU:
  - System board
  - LCD assembly

---

## Jumper Settings/Clear BIOS Password Procedures

1. Please see the bottom side of the main board.
2. Find G1 jumper and short the jumper to clear BIOS password.

## **FRU (Field Replaceable Unit) List**

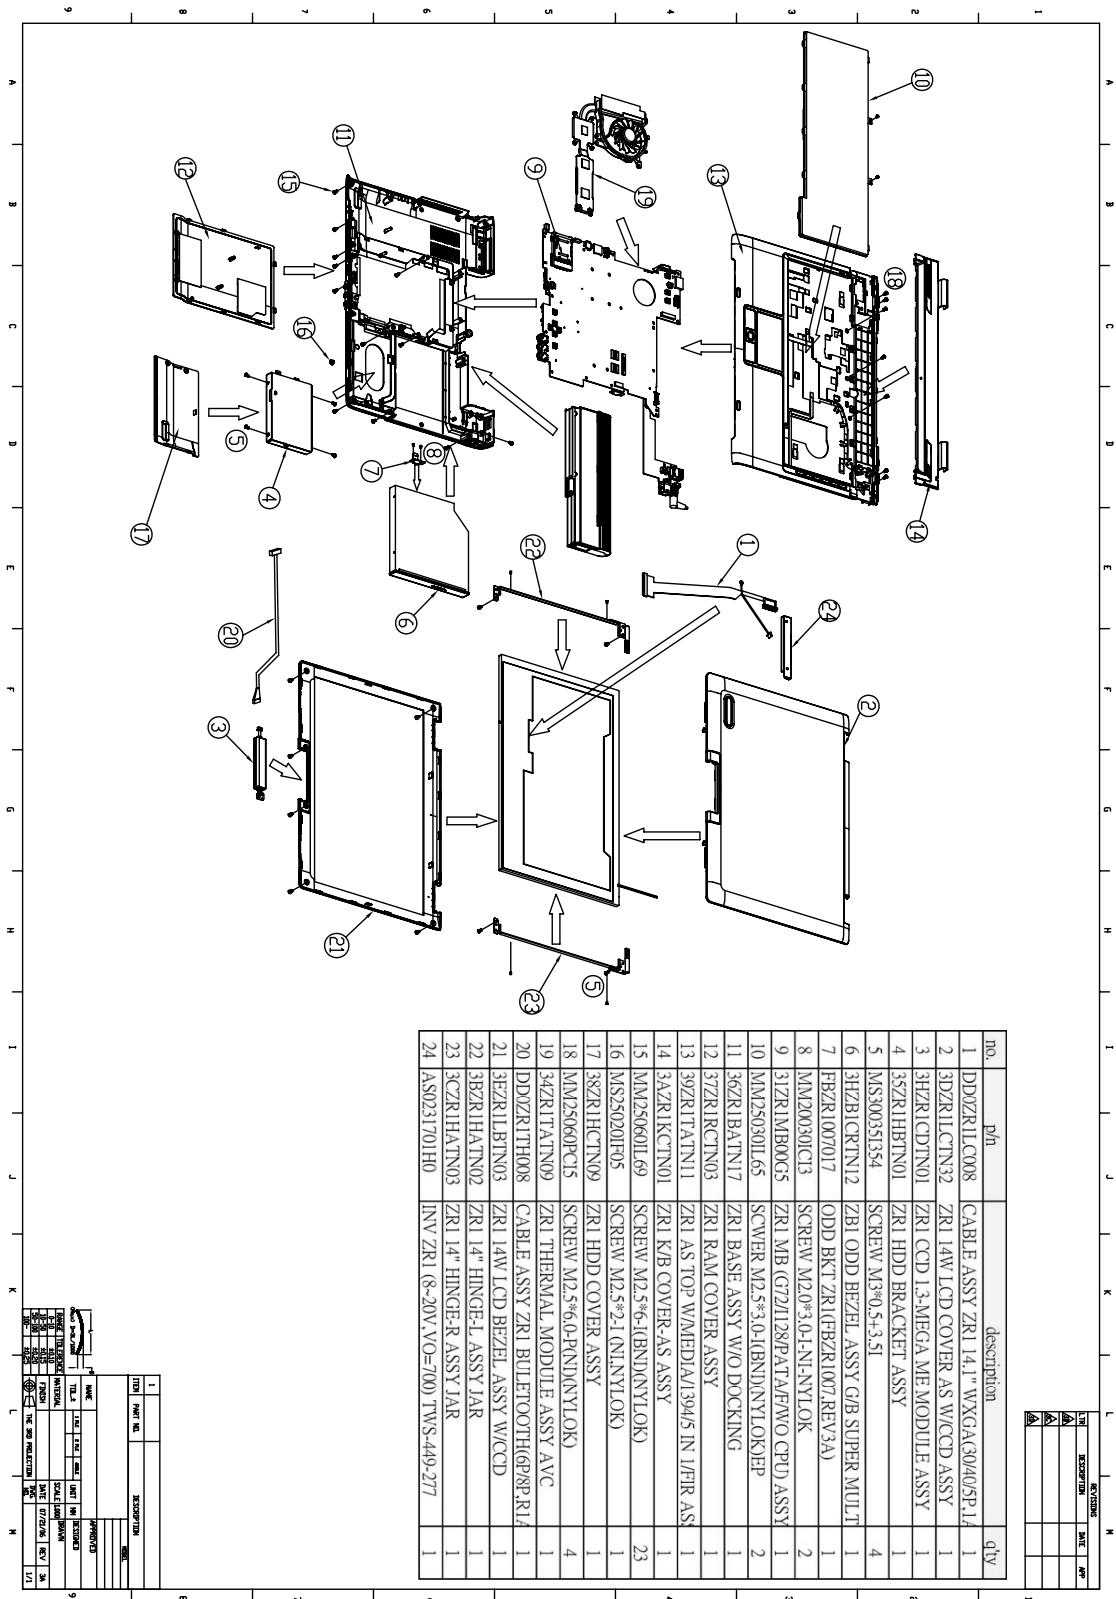

---

This chapter gives you the FRU (Field Replaceable Unit) listing in global configurations of Aspire 3680/5570/5580. Refer to this chapter whenever ordering for parts to repair or for RMA (Return Merchandise Authorization).

Please note that WHEN ORDERING FRU PARTS, you should check the most up-to-date information available on your regional web or channel. For whatever reasons a part number change is made, it will not be noted on the printed Service Guide. For ACER AUTHORIZED SERVICE PROVIDERS, your Acer office may have a DIFFERENT part number code from those given in the FRU list of this printed Service Guide. You MUST use the local FRU list provided by your regional Acer office to order FRU parts for repair and service of customer machines.

NOTE: To scrap or to return the defective parts, you should follow the local government ordinance or regulations on how to dispose it properly, or follow the rules set by your regional Acer office on how to return it.

# Aspire 3680/5570/5580 Exploded Diagram

NOTE: The FRU List is not for Aspire 3680/5570/5580. The FRU list for Aspire 3680/5570/5580 is not ready as the service guide released. We will update the FRU list as soon as we got the latest FRU list.

### Aspire 3680/5570/5580 FRU List

## Test Compatible Components

---

This computer's compatibility is tested and verified by Acer's internal testing department. All of its system functions are tested under Windows® XP Home, Windows® XP Pro environment.

Refer to the following lists for components, adapter cards, and peripherals which have passed these tests. Regarding configuration, combination and test procedures, please refer to the Aspire 3680/5570/5580 series Compatibility Test Report released by the Acer Mobile System Testing Department.

# Microsoft® Windows® XP Pro Environment Test

## Online Support Information

---

This section describes online technical support services available to help you repair your Acer Systems.

If you are a distributor, dealer, ASP or TPM, please refer your technical queries to your local Acer branch office. Acer Branch Offices and Regional Business Units may access our website. However some information sources will require a user i.d. and password. These can be obtained directly from Acer CSD Taiwan.

Acer's Website offers you convenient and valuable support resources whenever you need them.

In the Technical Information section you can download information on all of Acer's Notebook, Desktop and Server models including:

- Service guides for all models
- User's manuals
- Training materials
- Bios updates
- Software utilities
- Spare parts lists
- TABs (Technical Announcement Bulletin)

For these purposes, we have included an Acrobat File to facilitate the problem-free downloading of our technical material.

Also contained on this website are:

- Detailed information on Acer's International Traveler's Warranty (ITW)
- Returned material authorization procedures
- An overview of all the support services we offer, accompanied by a list of telephone, fax and email contacts for all your technical queries.

We are always looking for ways to optimize and improve our services, so if you have any suggestions or comments, please do not hesitate to communicate these to us.
